

ENDOCRINE SYSTEM

Endocrine System: WORKING TOGETHER

Each organ system works on other systems within the body to do its "job". See below to learn just some of the ways that the endocrine system interacts with other organ systems.

Nervous System

Circulatory System

Endocrine System: FACTS

Endocrine System: PROBLEMS

Most of the time, the endocrine system works perfectly well. However, sometimes problems can arise.

Diabetes

Diabetes is a condition that causes high blood glucose (sugar) levels. It is caused by the body being unable to either produce or use the hormone insulin. So, the glucose (sugar) gets stuck in the blood. Symptoms include increased thirst, weight loss, frequent urination, blurred vision, slow wound healing, and frequent weight changes, persistent acne, rashes, or itching in the hands.

Endocrine System: KEY TERMS

Term	Definition
Endocrine System	Network of endocrine glands that make, store, and release hormones.
Hormones	Chemical messengers that carry information and instructions from one cell to another.

Endocrine System: HORMONES

Hormones are chemical signals. Hormones are released into the bloodstream by endocrine glands. They travel through the bloodstream and bind to target cells, which then respond by changing their behavior. Hormones can be made by the endocrine system or by other parts of the body.

Endocrine System: FIGHT-OR-FLIGHT

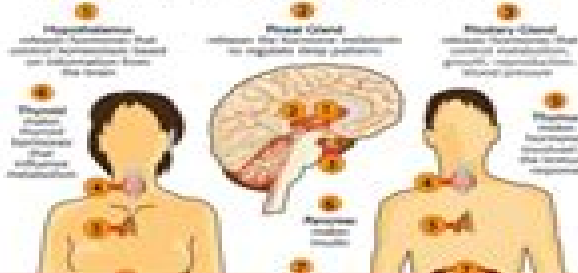

The fight-or-flight response is a reaction that occurs in the body when you are really frightened. The body's fight-or-flight response is the body's way of reacting to a dangerous situation. When you feel scared, your body releases hormones that help you react quickly. These hormones make your heart beat faster, your breathing faster, and your muscles tense up. This helps you to run away from danger or fight back.

When you are not frightened, your body releases hormones that help you relax. These hormones make your heart beat slower, your breathing slower, and your muscles relax. This helps you to calm down and think clearly.

Endocrine System: GLANDS

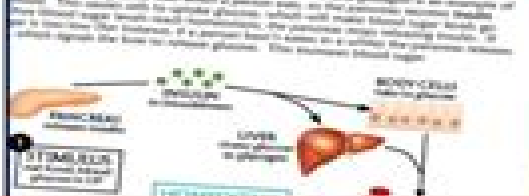

A gland is a structure that produces and releases substances that perform a specific function in the body. There are many different types of glands in the body. Some glands release hormones, while others release enzymes or other substances. The endocrine system is made up of glands that release hormones.

Endocrine System: FEEDBACK LOOPS

Endocrine activities are regulated by complex feedback loops. These feedback loops help the body maintain a balance of hormones. When a hormone level is too high or too low, the body releases a signal that tells the glands to produce more or less of that hormone. This helps to keep the hormone levels in the body within a normal range.

There are two main types of feedback loops: negative feedback loops and positive feedback loops. Negative feedback loops are the most common. They work by reducing the output of a system when the output is too high. Positive feedback loops work by increasing the output of a system when the output is too low.

Dispelling myths about neuroscience, Spence and Mitra explore how brain-based research informs literacy research in a way that is clear and accessible to pre-service teachers. Chapters address theories of reading, social-emotional learning, phonological processes, embodiment, multilingualism, reading comprehension, and more. Featuring examples of instruction and consistent 'Did you know' and 'Food for thought' sections, readers will come away with a greater understanding of the reading brain and how neuroscience can facilitate effective instruction. Delving into the extent to which neuroscience can underpin reading research, this text is ideal for pre-service teachers, educators, and students in the fields of language arts and literacy, as well as cognitive neuroscience. **Teaching Dance as Art in Education** Brenda Pugh McCutchen, 2006 Brenda McCutchen provides an integrated approach to dance education using four cornerstones: dancing and performing, creating and composing, historical and cultural inquiry, and analysing and critiquing. She also illustrates the main developmental aspects of dance. **Emotional Intelligence in Schools** Katherine M. Krefft, 2019-11-13 This text presents a methodical, organized approach to counseling students in emotional intelligence (EI) by detailing how to understand and direct emotions.

while also keying counselors directly to the underlying emotional motivations behind the behaviors Divided into four units the book starts with an overview of emotions and continues to explore the nature of anger fear grief and guilt Chapters present both explanatory narratives and teen centered activities to show how these challenging uncomfortable feelings when unregulated may negate resiliency and lead to anxiety bullying depression and teen suicide Counselors and educators alike will benefit from the light unexacting tone that encourages humor and levity and discusses how to handle difficult emotions without harsh and heavy overtones Certified Rehabilitation Counselor Examination Preparation, Third Edition Fong Chan, Malachy Bishop, Julie Chronister, Julie A.
