Geography Question Paper And Memorandum 2 2015:

The Drone Memos Jameel Jaffer, 2010-01-12 A trenchant summation and analysis of the legal rationales behind the US drone policy of targeted killing of suspected terrorists including US citizens Publishers Weekly starred review In the long response to 9 11 the US government initiated a deeply controversial policy of targeted killing the extrajudicial execution of suspected terrorists and militants typically via drones A remarkable effort was made to legitimize this practice one that most human rights experts agree is illegal and that the United States has historically condemned In The Drone Memos civil rights lawyer Jameel Jaffer presents and assesses the legal memos and policy documents that enabled the Obama administration to put this program into action In a lucid and provocative introduction Jaffer who led the ACLU legal team that secured the release of many of the documents evaluates the drone memos in light of domestic and international law He connects the documents legal abstractions to the real world violence they allow and makes the case that we are trading core principles of democracy and human rights for the illusion of security A careful study of a secretive counterterrorism infrastructure capable of sustaining endless orderless war this book is profoundly necessary Katrina vanden Heuvel editor and publisher of The Nation

Western Balkan Economies in Transition Reiner Osbild, Will Bartlett, 2018-08-23 This book explores the economic and social development of the Western Balkan region a group of six countries that are potential candidates for EU membership It focuses on the key economic issues facing these countries including the challenge of promoting economic growth limiting public deficits and debt and fostering international trade relations Given the severe impact of the recent economic crisis on social welfare in the region it also investigates the nature and extent of social exclusion a factor likely to produce future political instabilities if not effectively addressed by a return to sustainable economic growth The contributions explore these issues in light of the major influence of EU policy instruments and advice which are currently guiding the economies along an accession trajectory to future EU membership

Drawing Futures Bob Sheil,Frédéric Migayrou,Luke Pearson,Laura Allen,2016-11-11 Drawing Futures brings together international designers and artists for speculations in contemporary drawing for art and architecture Despite numerous developments in technological manufacture and computational design that provide new grounds for designers the act of drawing still plays a central role as a vehicle for speculation There is a rich and long history of drawing tied to innovations in technology as well as to revolutions in our philosophical understanding of the world In reflection of a society now underpinned by computational networks and interfaces allowing hitherto unprecedented views of the world the changing status of the drawing and its representation as a political act demands a platform for reflection and innovation Drawing Futures will present a compendium of projects writings and interviews that critically reassess the act of drawing and where its future may lie Drawing Futures focuses on the discussion of how the field of drawing may expand synchronously alongside technological and computational developments The book coincides with an international conference of the same name taking place at The Bartlett School of Architecture UCL in November 2016 Bringing together practitioners from many creative fields the book discusses how drawing is changing in relation to new technologies for the production and dissemination of ideas

PLATE: Product Lifetimes And The Environment C.A. Bakker,R. Mugge,2017-11-14 Product lifetimes are critical for the circular economy resource efficiency waste reduction and low carbon strategies for sustainability and are therefore of interest to academics from many different disciplines as well as original equipment manufacturers OEMs and other stakeholders The challenges related to product lifetimes must be tackled from multiple perspectives making the sharing of knowledge and expertise from different disciplines particularly important This book presents papers from the second Product Lifetime and the Environment PLATE conference held in Delft the Netherlands in November 2017 The conference originated from the desire to bring together academic researchers working in the field of sustainability to benefit from each other s knowledge and further advance the field The book includes the 88 full papers delivered at the conference grouped according to the following 7 conference themes design for product longevity product lifetime optimization cultural perspectives on the throwaway society circular economy and product lifetimes business opportunities economic implications and marketing strategies consumer influences on product lifetimes and policy regulation and legislation The book will be of interest to all those concerned with sustainable consumption circular economy and resource efficiency **British Naval Intelligence**

through the Twentieth Century Andrew Boyd,2020-08-30 This is the first comprehensive account of how intelligence influenced and sustained British naval power from the mid nineteenth century when the Admiralty first created a dedicated intelligence department through to the end of the Cold War It brings a critical new dimension to our understanding of British naval history in this period while setting naval intelligence in a wider context and emphasising the many parts of the British state that contributed to naval requirements It is also a fascinating study of how naval needs and personalities shaped the British intelligence community that exists today and the concepts and values that underpin it The author explains why and

how intelligence was collected and assesses its real impact on policy and operations It confirms that naval intelligence was critical to Britain's survival and ultimate victory in the two World Wars but significantly reappraises its role highlighting the importance of communications intelligence to an effective blockade in the First and according Ultra less dominance compared to other sources in the Second It reveals that coverage of Germany before 1914 and of the three Axis powers in the interwar period was more comprehensive and effective than previously suggested and while British power declined rapidly after 1945 the book shows how intelligence helped the Royal Navy to remain a significant global force for the rest of the twentieth century and in submarine warfare especially in the second half of the Cold War to achieve influence and impact for Britain far exceeding resources expended This compelling new history will have wide appeal to all readers interested in intelligence and its crucial impact on naval policy and operations Separatism and the State Damien Kingsbury, 2021-02-28

This book proposes and tests a theory of separatism to determine if there are key commonalities as to why separatist movements rise and what fuels them In the post Cold War period separatism has been on the rise Today there are more than 100 active separatist movements with around 70 of them engaging in violence This book focuses on examples from Europe the Middle East Africa and Asia to highlight the commonalities found across the case studies It examines the idea of separatism to better understand what drives movements to break away from preexisting states demonstrates the factors which produce both violent separatism and the rise of armed non state actors and shows the options for the resolution of such conflict based on considering claims for separatism from the perspectives of separatist movements This book will be applicable for undergraduate and postgraduate students of International Relations and International Politics as well as Conflict Peace Studies Anthropology and Post Colonial Studies **Muslim Fashion** Reina Lewis, 2015-10-15 In the shops of London's Oxford Street girls wear patterned scarves over their hair as they cluster around makeup counters Alongside them hip twenty somethings style their head wraps in high black topknots to match their black boot cut trousers Participating in the world of popular mainstream fashion often thought to be the domain of the West these young Muslim women are part of an emergent cross faith transnational youth subculture of modest fashion In treating hijab and other forms of modest clothing as fashion Reina Lewis counters the overuse of images of veiled women as evidence in the prevalent suggestion that Muslims and Islam are incompatible with Western modernity Muslim Fashion contextualizes modest wardrobe styling within Islamic and global consumer cultures interviewing key players including designers bloggers shoppers store clerks and shop owners Focusing on Britain North America and Turkey Lewis provides insights into the ways young Muslim women use multiple fashion systems to negotiate religion identity and ethnicity **The Populist Temptation** Barry

Eichengreen, 2018-05-03 Populism of the right and left has spread like wildfire throughout the world The impulse reached its apogee in the United States with the election of Trump but it was a force in Europe ever since the Great Recession sent the European economy into a prolonged tailspin In the simplest terms populism is a political ideology that vilifies economic and

political elites and instead lionizes the people. The people populists of all stripes contend need to retake power from the unaccountable elites who have left them powerless. And typically populists distrust of elites shades into a catchall distrust of trained experts because of their perceived distance from and contempt for the people. Another signature element of populist movements is faith in a savior who can not only speak directly to the people but also serve as a vessel for the plain people's hopes and dreams. Going back to the 1890s a series of such saviors have come and gone in the US alone from William Jennings Bryan to Huey Long to finally Donald Trump. In *The Populist Temptation* the eminent economic historian Barry Eichengreen focuses on the global resurgence of populism today and places it in a deep context. Alternating between the present and earlier populist waves from modern history he argues that populists tend to thrive most in the wake of economic downturns when it is easy to convince the masses of elite malfeasance. Yet while there is more than a grain of truth that bankers, financiers and bought politicians are responsible for the mess, populists' own solutions tend to be simplistic and economically counterproductive. Moreover, by arguing that the ordinary people are at the mercy of extra-national forces beyond their control, international capital, immigrants, cosmopolitan globalists, populists often degenerate into demagoguery and xenophobia. There is no one solution to addressing the concerns that populists raise but Eichengreen argues that there is an obvious place to start: shoring up and improving the welfare state so that it is better able to act as a buffer for those who suffer most during economic slumps. For example, America's patchwork welfare state was not well equipped to deal with the economic fallout that attended globalization and the decline of manufacturing in America and that played no small part in Trump's victory. Lucidly explaining both the appeals and dangers of populism across history, this book is essential reading for anyone seeking to understand not just the populist phenomenon but more generally the lasting political fallout that follows in the wake of major economic crises.

Lands of the Future Echi Christina Gabbert, Fana Gebresenbet, John G. Galaty, Günther Schlee, 2021-01-15

Rangeland forests and riverine landscapes of pastoral communities in Eastern Africa are increasingly under threat. Abetted by states who think that outsiders can better use the lands than the people who have lived there for centuries, outside commercial interests have displaced indigenous dwellers from pastoral territories. This volume presents case studies from Eastern Africa based on long-term field research that vividly illustrate the struggles and strategies of those who face dispossession and also discredit ideological false modernist tropes like backwardness and primitiveness.

China's peaceful rise Christopher Herrick, Zheyi Gai, Surain Subramaniam, 2016-09-26. Adopting a constructivist approach, this book argues that China's prospects for achieving great power status peacefully depend more on perceptions of the country's development than on concrete measures of power or economic benefits. Incorporating historical perceptions, survey data and general analysis, the authors explore Chinese foreign policies in international organisations, international trade, security relations and as a model for global governance, as well as the reactions to those policies within the context of China's relations with Asian neighbours, India, Japan and the states of South-east Asia, existing international powers, the European

Union Russia and the United States and emergent trading partners Africa **Tourism and Geopolitics** Derek R Hall, 2017-01-25 With 29 contributors from across Europe and beyond this work represents a unique and important resource that examines the many relationships between tourism and geopolitics with a focus on experiences drawn from Central and Eastern Europe It begins by assessing the changing nature of geopolitics from pejorative associations with Nazism to the more recent critical and feminist geopolitics of social science s cultural turn The book then addresses the important historical role of Central and Eastern Europe CEE in geopolitical thinking before exemplifying a range of contemporary interactions between tourism and geopolitics within this critical region Pursuing innovative analytical paths the book demonstrates the interrelated nature of tourism and geopolitics and emphasizes the freshness of this research area Addressing key principles and ideas which are applicable globally it is an essential source for researchers teachers and students of tourism geography political science and European studies as well as for diplomatic business and consultant practitioners **From Head Shops**

to Whole Foods Joshua C. Davis, 2017-08-08 In the 1960s and 70s a diverse range of storefronts including head shops African American bookstores feminist businesses and organic grocers brought the work of the New Left Black Power feminism environmentalism and other movements into the marketplace Through shared ownership limited growth and democratic workplaces these activist entrepreneurs offered alternatives to conventional profit driven corporate business models By the middle of the 1970s thousands of these enterprises operated across the United States but only a handful survive today Some such as Whole Foods Market have abandoned their quest for collective political change in favor of maximizing profits Vividly portraying the struggles successes and sacrifices of these unlikely entrepreneurs From Head Shops to Whole Foods writes a new history of social movements and capitalism by showing how activists embraced small businesses in a way few historians have considered The book challenges the widespread but mistaken idea that activism and political dissent are inherently antithetical to participation in the marketplace Joshua Clark Davis uncovers the historical roots of contemporary interest in ethical consumption social enterprise buying local and mission driven business while also showing how today s companies have adopted the language but not often the mission of liberation and social change
