

31. What are the most difficult decisions to make?

This is one of the most typical behavioral questions in an interview. With this question, the interviewer is planning to examine your behaviors under a problem and how you handle it. You may answer as sincerely as you wish, but there is one tip that you should notice: what you did in the past is not the indication of how you will behave in the future. The key is learning.

First, you address the difficult situation you were in and describe it. Then, tell the interviewer how you did resolve it (or acted under such situation). Remember to keep a positive tone (for example, when you talked about those who had made mistakes) and be specific about details of your solution. Finally, tell the interviewer of what you have learn from such experience.

You may even scan your memory for many problems and consider them as challenges and how you resolved them in a professional manner. But eventually, don't forget to tell the interviewer what you have learn from all of those.
