**Capabilities and Happiness** Luigino Bruni, Flavio Comim, Maurizio Pugno, 2008-10-30 Few would dispute that the well being of individuals is one of the most desirable aims of human actions However approaches on how to define measure evaluate and promote well being differ widely The conventional economic approach takes income or the power to acquire market goods as the most important indicator for well being and the utility function as the formal device for positive and normative analysis However this approach to well being has been questioned for being seriously limited and other approaches have arisen The capability approach to well being which has been developed during the last two decades by Amartya Sen and Martha Nussbaum and the Happiness Approach to well being championed by Richard Easterlin both provide an alternative Both approaches come

from different traditions and have developed independently but nevertheless aim to overcome the rigid boundaries of the conventional economic approach to well being Given these common aims it is surprising that little comparative work has been undertaken across these approaches This book aims to correct this by providing the reader with contributions from leading names associated with both approaches as well as contributions which evaluate the approaches and contrast one with the other *Special Sciences and the Unity of Science* Olga Pombo, Juan Manuel Torres, John Symons, Shahid

Rahman, 2012-02-01 Science is a dynamic process in which the assimilation of new phenomena perspectives and hypotheses into the scientific corpus takes place slowly The apparent disunity of the sciences is the unavoidable consequence of this gradual integration process Some thinkers label this dynamical circumstance a crisis However a retrospective view of the practical results of the scientific enterprise and of science itself grants us a clear view of the unity of the human knowledge seeking enterprise This book provides many arguments case studies and examples in favor of the unity of science These contributions touch upon various scientific perspectives and disciplines such as Physics Computer Science Biology Neuroscience Cognitive Psychology and Economics **Genetic Surveillance and Crime Control** Helena Machado, Rafaela Granja, 2021-11-29 Genetic Surveillance and Crime Control presents a new empirical and conceptual framework for understanding trends of genetic surveillance in different countries in Europe and in other jurisdictions around the world The use of DNA or genome for state level surveillance for crime governance is becoming the norm in democratic societies In the post DNA contemporary modes of criminal identification are gradually changing through the increasing expansion of transnational sharing of DNA data along with the development of highly controversial genetic technologies that pose acute challenges to privacy and generate fears of discrimination racism and stigmatization Some questions that guide this book are How is genetic surveillance in the governance of crime intertwined with society ethics culture and politics What are the views and expectations of diverse stakeholders scientists police agencies and non governmental organizations How can social sciences research about genetic surveillance accommodate socio cultural and historical differences and be sensitive to specificities of post authoritarian societies in Europe Taking an interdisciplinary approach focused on challenges to genetic privacy human rights and citizenship in contemporary societies this book will be of interest to students and scholars of social studies of science and technology sociology criminology law and policing international relations and forensic sciences

**Gothic Sovereignty** Jon Horne Carter, 2022-02-01 Gang related violence has forced thousands of Hondurans to flee their country leaving behind everything as refugees and undocumented migrants abroad To uncover how this happened Jon Carter looks back to the mid 2000s when neighborhood gangs were scrambling to survive state violence and mass incarceration locating there a critique of neoliberal globalization and state corruption that foreshadows Honduras s current crises Carter begins with the story of a thirteen year old gang member accused in the murder of an undercover DEA agent asking how the nation s seductive criminal underworld has transformed the lives of young people He then widens the lens to describe a history of imperialism and corruption that shaped this underworld from Cold War counterinsurgency to the War on Drugs to the near impunity of white collar crime as he follows local gangs who embrace new trades in the illicit economy Carter describes the gangs transformation from neighborhood groups to sprawling criminal societies even in the National Penitentiary where they have become political as much as criminal communities Gothic Sovereignty reveals not only how the revolutionary potential of gangs was lost when they merged with powerful cartels but also how close analysis of criminal communities enables profound reflection on the economic legal and existential discontents of globalization in late liberal nation states

**Masculinities in the Criminological Field** Ingrid Lander, Signe Ravn, 2016-05-06 Over recent decades criminological research has changed from a gender blind discipline which equated crime with men and thus ignored questions about gender to an approach that studied gender by showing statistical differences between men and women and then finally to a more inclusive and elaborate gender theoretical approach to crime and crime control However despite this development research on gender and in particular research on gendered norms and the construction and enactment of masculinities within the criminological field has been unable to keep up with developments in gender research Since 1990 only a few anthologies with a gender theoretical orientation focusing on masculinities within the criminological research field have been published Many of the theoretical developments in gender research still have difficulties in reaching into mainstream criminology partly because such developments are often published in feminist and or gender theoretical journals This volume both problematizes and renders visible conceptions and norms regarding male behaviour and masculinities and
