**Entrepreneurs, Managers, and Leaders** Anthony J. Mayo, Nitin Nohria, Mark Rennella, 2009-09-15 Entrepreneurs, Managers and Leaders examines the role

that business leaders play in shaping industries and how the evolving context of industries shapes leaders in turn This co evolutionary process of leadership and industry development is told through the story of the American airline industry across the 20th century Entrepreneurs who explored a variety of different airline concepts in search of a viable business model dominate the industry s early history As the industry evolved a new breed of managers emerged who built a dominant business model that enabled their companies to grow dramatically Later after the industry matured leaders took center stage as agents of change to rebuild and revitalize the industry The lessons to be drawn from the experience of the airlines and their executives will be of interest to business leaders in industries across a wide spectrum Despite the indelible mark that many individuals have made on their industry writers on industry evolution concerning the airlines or any other industry have rarely factored in leadership as a way of explaining or understanding that evolution Entrepreneurs Managers and Leaders seeks to paint a fuller picture of the interdependent relationship between the actions of leaders the context of their times and the evolution of an industry

**Trust in a Complex World** Charles Heckscher,2015-10-30 Can we rebuild trust in a time of increasing conflict and paralysis Or rather can we build trust for the first time wide and strong enough to bring us together to work on the complex problems of our age Relations of trust have been weakened over the past century by a historic expansion of communication and cross cultural interaction and the advance of complex fluid relationships Now the rapid rise of the internet has accelerated the disruption Many long for the comfort and security of relations in which one knew whom to trust and what to expect yet at the same time they may embrace the dynamism and creativity that comes from mixing of cultures and perspectives This book explores current conflicts and confusions of relations and identities using both general theory and specific cases It argues that we are at a catalyzing moment in a long transition from a community in which the prime rule was tolerance to one with a commitment to understanding from one where it was considered wrong to argue about cultural differences to one where such arguments are essential The development of this rich community is essential as well as difficult Complex societies produce complex challenges from climate change to inequality to the risk laden opportunities of bioengineering that demand collaboration among people with widely varying views Such brewing crises cannot be worked through without far more deliberate discussion and cooperation and higher levels of trust than we have today This book explores many challenges ahead and suggests some practical directions for resolving them
