state sovereignty is in worldwide eclipse in the face of the overwhelming processes of globalization He argues that this perception relies on ideas about sovereignty and globalization that are both overstated and misleading Agnew contends that sovereignty state control and authority over space is not necessarily neatly contained in state by state territories nor has it ever been so Yet the dominant image of globalization is the replacement of a territorialized world by one of networks and flows that know no borders other than those that define the Earth itself In challenging this image Agnew first traces the ways in which it has become commonplace He then develops a new way of thinking about the geography of effective sovereignty and the various geographical forms in which sovereignty actually operates in the world offering an exciting intellectual framework that breaks with the either or thinking of state sovereignty versus globalization

Translational Criminology and Counterterrorism Leslie W. Kennedy, Yasemin Irvin-Erickson, Alexis R. Kennedy, 2014-07-08. This brief focuses on translational criminology practices as they relate to counter terrorism and homeland security. The work provides a detailed and practical examination of how global threats such as terrorism and cybercrime are managed through local response. It covers emerging strategies in data collection, procedures, inter agency cooperation and new analytical techniques including risk terrain modeling. In addition, it presents a common methodology including steps in risk assessment, risk management and decision making that can be used to frame and analyze global and local threats. The authors examine these issues using examples of how law enforcement responded to specific security threats including the 2013 Boston Marathon bombings, the 2003 terrorist attack in Istanbul, Turkey and the 2010 Stuxnet attack on the Natanz nuclear facility in Iran. This work expands on existing literature covering the impact that globalization has on cross national threats, drawing on disciplines related to criminology such as international relations and political science.

The Global Public Sphere Ingrid Volkmer, 2014-07-17. Over the last several years, the debate about publics seems to have newly emerged. This debate critically reflects the Habermasian ideal of a national public sphere in a transnational context. However, it seems that the issue of a reconstruction of a global public sphere is more complex. In this brilliant and provocative book, Ingrid Volkmer argues that a reflective approach of globalization is required in order to identify and deconstruct key strata of deliberate public discourse in supra and subnational societal formations. This construction helps to understand the new processes of legitimacy at the beginning of the 21st century in which the traditional conception of a public and its role as a legitimizing force are being challenged and transformed. The book unfolds this key phenomenon of global deliberate interconnectedness as a discursive and negotiated dimension within reflective globalization, i.e. continuously constituting, maintaining and refining the life of the global public and conceptualizes a global public sphere. Offering insightful case studies to illustrate this new theory of the global public sphere, the book will be essential reading for students and scholars of media and communication studies and

Rising Powers, Global Governance and Global Ethics Jamie Gaskarth, 2015-02-11

Two of the dominant themes of discussion in international relations scholarship over the last decade have been global governance and rising powers Underlying both discussions are profound ethical questions about how the world should be ordered who is responsible for addressing global problems how change can be managed and how global governance can be made to work for peoples in developing as well as developed states Yet these are often not addressed or only briefly mentioned as ethical dilemmas by commentators This book seeks to ask critical and profound questions about what relative shifts in power among states might mean for the ethics and practice of global governance Three key questions are addressed throughout the volume Who is rising and how How does this impact on global governance What are the implications of these developments for global ethics Through these questions some of the key academics in the field explore how far debates over global ethics are really between competing visions of how international society should be governed as opposed to tensions within the same broad paradigm By examining how governance works in practice across the Middle East Africa and Asia the contributors to this volume seek to critique the way global governance discourse masks the exercise of power by elites and states both developed and rising This work will be essential reading for all those with an interest in the future of international relations and global governance
