

QUICK HARVARD REFERENCING GUIDE

This guide provides practical examples to help you create references for information sources using the APU Harvard referencing style.

- **In-text Referencing:** involves citing references within the text of your work where you have used ideas or material from other sources.
- **End-text referencing** (also known as your Reference List): includes all materials used in your document. It provides the full information of reference sources necessary for a reader to locate and retrieve them.

IMPORTANT NOTE: When writing your reference list, do not present them in different section based on the types of information sources. All sources of information must be presenting in a single list in ascending alphabetical order.
