  - B. To establish nursing theory that incorporates the biopsychosocial nature of humans.
  - C. As a tool to organize thinking and clinical decision making about clients' healthcare needs.
  - D. To promote the management of client care in collaboration with other healthcare professionals. - C
- (The nursing process is a problem-solving approach that provides an organized, systematic, decision making process to effectively address the client's needs and problems. The nursing process includes an organized framework using knowledge, judgments, and actions by the nurse as the client's plan of care is determined, and encompasses assessment, analysis, planning, implementation, and evaluation of client care (C).   - B. Document the nursing care plan in the progress notes.
  - C. Determine whether a client's health problems have been alleviated.
  - D. Examine the effectiveness of nursing interventions toward meeting client outcomes. - D
- In the nursing process, the evaluation component examines the effectiveness of nursing interventions in achieving client outcomes (D). (A) is an evaluation of client satisfaction, not outcomes.
