These include: allied tradespersons; cleaning chemical and equipment formulators and manufacturers; upholstery and furniture manufacturers; international, national and regional trade associations; organizations serving the professionals cleaning industry, both independent and franchise; cleaning industry training schools; cleaning service companies; and others with specialized experience. The IICRC S300 provides a specific set of practical standards for upholstery cleaning. It does not attempt to teach comprehensive upholstery cleaning procedures; rather, it provides the foundational principle for proper cleaning practice.

ANSI/IICRC S500 - Standard and Reference Guide for Professional Water Damage Restoration – 2006

The IICRC Standard for Professional Water Damage Restoration (ANSI/IICRC S500-2006) is a procedural standard. It is based on reliable restoration principles, research and practical experience. In addition, there has been extensive consultation and information obtained from numerous sources. These sources include, but are not necessarily limited to, the scientific community, the international, national and regional trade associations serving the professional disaster restoration industry, chemical formulators and equipment manufacturers, cleaning and restoration training schools, restoration service companies, the insurance industry, allied trades persons and others with specialized experience. It is subject to further revision as developments occur in technology, testing and processing procedures.

The Third Edition of the ANSI/IICRC S500-2006 Standard and Reference Guide has been completely updated and rewritten with the best information and knowledge of the time. Additional Chapters and Sections have been added to the S500 that have not been included previously. These areas include: Building and Material Science, Psychrometry by Definition, Psychrometry and the Science of Drying, Limitations, Complexities, Complications and Conflicts, Structural Restoration, HVAC, Contents Evaluation Restoration and Remediation, and Large or Catastrophic Restoration. Also, note that Carpet Disengagement and Reinstallation has been moved back into the Appendix of the document.

The ANSI/IICRC S500-2006 provides a specific set of practical standards for water damage restoration. It does not attempt to teach comprehensive water damage restoration procedures; rather it provides the foundation for basic principles of proper restoration practices. ANSI/IICRC S500-2006 does not attempt to include exhaustive performance characteristics or standards for the manufacture or installation of structural components, materials and contents (personal property).

The ANSI/IICRC S500-2006 Standard and Reference Guide is presented using a two-part format: the standard itself and a supplementary reference guide. The procedural standard is featured in this first section, supported by the reference guide in the second section. The intent is to use the principles outlined in the reference guide as a tool to better understand and apply the standard itself. However, the reference guide is not considered part of this standard.

IICRC S520 - Standard and Reference Guide for Professional Mold Remediation – 2008

The S520 is a procedural standard. It is based on reliable remediation principles, review of available scientific and industry literature and information and practical experience. In addition, there has been extensive consultation with, and information obtained from, numerous other sources. The Second Edition of the S520 has been updated and rewritten. An additional Chapter and Section have been added covering Building and Material Science, and an additional section has been added covering Equipment, Tools and Materials. This document supersedes the The IICRC S520 Standard and Reference Guide for Professional Mold Remediation (S520 First Edition 2003, 2004).

This document is written for use by those involved in the mold remediation industry, primarily for mold remediation companies and workers, and secondarily, for others who investigate or assess mold complaints, prepare remediation specifications, protocols or procedures, and manage remediation projects, (e.g., indoor environmental professionals (IEPs), other specialized experts) and finally, for other potential materially interested parties (e.g., consumers and occupants, property owners and managers, insurance company representatives, government and regulatory bodies).

ANSI/IICRC S800 Standard and Reference Guide for Professional Inspection of Textile Floorcovering - 2014

ANSI/IICRC S800 defines basic operational procedures and techniques for inspecting/evaluating: carpet types, characteristics and conditions; specification; installation procedures; and post-installation maintenance and cleaning. This enables professional inspectors to determine appropriate procedures for inspecting textile floor coverings. S800 is not written to teach detailed inspection procedures; numerous manuals, videotapes, workshops and seminars are available to teach comprehensive textile floor covering inspection procedures. This standard was created for use primarily by professional inspectors, and secondarily for carpet manufacturers, product suppliers, building contractors, architects, specifiers, designers, distributors, flooring retailers, end-users, facility managers, institutions and others involved in the textile flooring inspection industry.
