

Advantages and Disadvantages of Internet

Advantages

- **Flawless communication:** The Internet offers flawless and faster communication. It has covered the entire globe, and no matter where you are, you can communicate even from the remotest of the locations. Getting in touch with families and friends becomes easy through it. Not just getting in touch with loved ones, but businesses have also become more accessible through the Internet. Also, it is only due to the Internet that today we can work from home.
- **Online Education:** The Internet has made it possible for students sitting in the remotest of the areas to avail education. Many schools, educational institutions, and colleges are now conducting online classes for such students. Also, due to Covid-19, the students can continue with uninterrupted studies only because of the Internet.
- **E-commerce and Online Services:** Today, sitting at home, we can scroll all the products of an online store and order whatever we feel like. Also, small companies and people in business are taking advantage of the Internet to enter the global market. All of these are possible only because of the Internet. Artisans, craftsmen, etc., sitting in remote areas can now sell their art pieces through the Internet in the global market. Not just products, but you can also avail yourself of online services via the Internet. Booking a taxi, ordering food, or calling a mechanic has become a lot easier only because of it.
- **Abundant of Information:** The Internet provides a vital source of information. Search engines like Bing, Google, and Yahoo contain in-depth information on financial matters, government law and service, market information, economic affairs, technical information, educational and academic issues, new ideas, and technical support. It offers information at various levels of study and covers everything from scholarly articles to ones directed at children.

Disadvantages

- **Internet Addiction:** The Internet has made it impossible for people to live without it. This clearly shows that people have become addicted to the Internet. It has affected not just elders but kids also. Kids as old as two years today use mobile phones to watch online videos on apps like Youtube. The Internet has increased their screen time and restricted their mental growth.
- **Access to Wrong Information:** The Internet is available for everyone, and anyone can add information here. Hence the scope for wrong or false information arises. Everyone can run a website, and there are many free blogging platforms on the Internet so everyone can give information on the Internet. As a result, the Internet can possess wrong information, which is harmful to a user. It is one of the most important disadvantages of the Internet.
- **Theft of Personal Information:** When people use social networking websites or online banking services, they add their personal information like email ID, bank account number, credit card number, phone number, etc., in these places. A person expert in software or a hacker can easily retrieve this information and can cause a massive loss to the users. Hacker programs a harmful virus that gets into the computer system and destroys valuable data.
- **Spams:** The unnecessary emails, advertisements, calls that you receive every day are called spam. Sometimes these spam emails or calls can enter your system and make the user face many problems. Also, such spams are harassment for computer users and bad for the environment. This spam is stored in the inbox for many years and added to the server's storage space.
