Life in Space Maura Phillips Mackowski, 2022-05-24 This book explores the many aspects and outcomes of NASA's research in life sciences a little understood endeavor that has often been overlooked in histories of the space agency The academy, 1895 **NASA Workforce and Management Challenges** United States. Congress. House. Committee on Science. Subcommittee on Space and Aeronautics, 2003 Academy; a Weekly Review of Literature, Learning, Science and Art, 1895 The Poetical gazette the official organ of the Poetry society and a review of poetical affairs nos 4 7 issued as supplements to the Academy v 79 Oct 15 Nov 5 Dec 3 and 31 1910 *The Academy and Literature*, 1895 Applied Mechanics Reviews, 1996 **Academy and Literature** Charles Edward Cutts Birch Appleton, Charles Edward Doble, James Sutherland Cotton, Charles Lewis Hind, William Teignmouth Shore, Alfred Bruce Douglas, Ellis Ashmead-Bartlett, Thomas William Hodgson Crosland, 1895 **Non-State Actor Dynamics in International Law** Cedric Ryngaert, 2016-05-06 Non state actors have always been treated with ambivalence in the works of international law While their empirical existence is widely acknowledged and their impact and influence uncontested non state actors are still not in the centre of international legal research The idea that non state actors are not law makers however stands in sharp contrast with the growing notion of non state actors as law takers This book examines the position of non state actors in international law as law makers and law takers and questions whether these different positions can or should be separated from each other Each contribution reveals both the political and normative aspects of the question as well as the positivistic possibilities and constraints to accommodate non state actors as law takers and law makers in the contemporary international legal system Altogether each expert reveals that the position of non state actors in international law is not a fixed one but changes with the functional and theoretical perspectives of the observer Non State Actor Dynamics in International Law is a welcomed addition to an under researched field of legal study An indispensable read to scholars and policy makers wishing to gain new insights into general discourse on non state actors in international law and the process of norm formation in the international realm **New York Court of Appeals. Records and Briefs.** New York (State)., *Lady Astronauts, Lady Engineers, and Naked Ladies* Karin Hilck, 2019-07-08 The book *Lady Astronauts Lady Engineers and Naked Ladies* is a gender history of the American space community and by extension a social history of American society in the twentieth century during the Cold War In order to expand and differentiate the prevalent postwar narrative about gender relations and cultural structures in the United States the book analyzes several different groups of women interacting in different social spaces within the space community It therewith grants insight into the several layers of female participation and agency in the community and the gender and race based obstacles and hurdles the female prospective astronauts scientists engineers artists administrators writers hostesses secretaries and wives were faced with at NASA and in the space industry In each chapter a different social space within the space community is analyzed The spaces where the women lived and worked are researched from a media individual and

institutional angle ultimately revealing the differing gender philosophies communicated in the public sphere and the space community workplaces by government and space community officials While women were publicly encouraged to participate in the American space effort to beat the Soviet Union in the race to the moon women had to deal with gender based barriers which were integral to the structures of the space community just as they were an intrinsic component of all societal structures in the United States in the 1960s The female space workers who were often perceived as disrupters of the prevalent social order in the space community and discriminated by some of their male colleagues and bosses on a personal basis still managed to assert themselves They molded pockets of agency in the space community workspaces without the facilitation of regulations on the part of NASA that might have provided them with easier access or more agency Thus the space community a place of technological innovation was not necessarily also a place of social innovation but a community with a government agency at its center that mainly mirrored the current changing social order conventions and policies in the 1960s as well as in the 1970s and 1980s Nevertheless the women presented in this book were instrumental in advancing and consolidating the social transformation that happened within the space community and the United States and therefore make intriguing subjects of research Thus this systematic analysis of the connection between gender space and the Cold War adds a new dimension to space history as well as expands the discourse in American history about gender relations and the opportunities of women in the twentieth century Handbook of Research on Engaging Digital Natives in Higher Education Settings Pinheiro, Margarida M., Simões, Dora, 2016-03-29 The integration of technology has become so deeply rooted into modern society that the upcoming generation of students has never known a world without such innovations This defining trait calls for an examination of effective methods in which to support and motivate these learners The Handbook of Research on Engaging Digital Natives in Higher Education Settings focuses on the importance of educational institutions implementing technology into the learning and teaching process in order to prepare for students born into a digital world Highlighting relevant issues on teaching strategies and virtual education this book is a pivotal reference source for academicians upper level students practitioners and researchers actively involved in higher education **Science News-letter** ,1959
