

11 Which compound has the greatest percent composition by mass of sulfur?

- (1) BaS (2) CaS (3) MgS (4) SrS

way #64

12 Two molecules of HBr collide and then form H_2 and Br_2 . During the collision, the bonds in the HBr molecules are

- (1) broken as energy is absorbed
(2) broken as energy is released
(3) formed as energy is absorbed
(4) formed as energy is released

way #43

BARE

13 Which atom in the ground state has a stable electron configuration?

- (1) carbon (2) magnesium (3) neon (4) oxygen

way #49

14 Which statement describes a multiple covalent bond?

- (1) Two electrons are shared.
(2) Four electrons are shared.
(3) Two electrons are transferred.
(4) Four electrons are transferred.

way #46

15 The electronegativity difference between the atoms in a molecule of HCl can be used to determine

- (1) the entropy of the atoms
(2) the atomic number of the atoms
(3) the first ionization energy of the atoms
(4) the polarity of the bond between the two atoms

way #51

16 Which two gases can not be broken down by chemical means?

- (1) CO and He (2) CO and NH_3 (3) Xe and He (4) Xe and NH_3

way #5

elements Table S

17 Two substances in a mixture differ in density and particle size. These properties can be used to

- (1) separate the substances
(2) chemically combine the substances
(3) determine the freezing point of the mixture
(4) predict the electrical conductivity of the mixture

18 Which unit is used to express an amount of thermal energy?

- (1) gram (2) mole (3) joule (4) pascal

Table D

19 Under which conditions of temperature and pressure does a real gas behave most like an ideal gas?

- (1) low temperature and low pressure
(2) low temperature and high pressure
(3) high temperature and low pressure
(4) high temperature and high pressure

way #9

20 According to the kinetic molecular theory for an ideal gas, all gas particles

- (1) are in random, constant, straight-line motion
(2) are separated by very small distances relative to their sizes
(3) have strong intermolecular forces
(4) have collisions that decrease the total energy of the system

way #8

21 Which mathematical expression represents the heat of reaction for a chemical reaction?

- (1) (the heat of fusion) - (the heat of vaporization)
(2) (the heat of vaporization) - (the heat of fusion)
(3) (the potential energy of the products) - (the potential energy of the reactants)
(4) (the potential energy of the reactants) - (the potential energy of the products)

way #78

22 At 101.3 kPa and 298 K, a 1.0-mole sample of which compound absorbs the greatest amount of heat as the entire sample dissolves in water?

- (1) LiBr -48.83 (2) NaCl +2.38 (3) NaOH -46.51 (4) NH_4Cl +14.8

way #77

Table I

23 For a reaction at equilibrium, which change can increase the rates of the forward and reverse reactions?

- (1) a decrease in the concentration of the reactants
(2) a decrease in the surface area of the products
(3) an increase in the temperature of the system
(4) an increase in the activation energy of the forward reaction

June 2010 Physics Regents Answers Explanations

June 2010 Physics Regents Answers Explanations:

Catalog of Copyright Entries. Third Series Library of Congress. Copyright Office, 1977 How the Ray Gun Got Its Zap
Stephen R. Wilk, 2013-10-07 A collection of engaging essays that discusses odd and unusual topics in optics Evidence, Explanation, and Realism Peter Achinstein, 2010-05-28 The essays in this volume address three fundamental questions in the philosophy of science What is required for some fact to be evidence for a scientific hypothesis What does it mean to say that a scientist or a theory explains a phenomenon Should scientific theories that postulate unobservable entities such as electrons be construed realistically as aiming to correctly describe a world underlying what is directly observable or should such theories be understood as aiming to correctly describe only the observable world Distinguished philosopher of science Peter Achinstein provides answers to each of these questions in essays written over a period of more than 40 years The present volume brings together his important previously published essays allowing the reader to confront some of the most basic and challenging issues in the philosophy of science and to consider Achinstein's many influential contributions to the solution of these issues He presents a theory of evidence that relates this concept to probability and explanation a theory of explanation that relates this concept to an explaining act as well as to the different ways in which explanations are to be evaluated and an empirical defense of scientific realism that invokes both the concept of evidence and that of explanation Congressional Record United States. Congress, 2010 **Resources in Education**, 1997 *Testing Regimes, Accountabilities and Education Policy* Bob Lingard, Goli Rezai-Rashti, Wayne Martino, 2017-10-02 Around the globe various kinds of testing including high stakes national census testing have become meta policies steering educational systems in particular directions and having great effects on schools and on teacher practices as well as upon student learning and curricula There has also been a complementary global aspect to this with the OECD's PISA and IEA's TIMSS and PIRLS which have had impacts on national education systems and their policy frameworks While there has been a globalized educational policy discourse that suggests that high stakes standardised testing will drive up standards and enhance the quality of a nation's human capital and thus their international economic competitiveness this discourse still manifests itself in specific vernacular path dependent ways in different nations High stakes testing and its effects can also be seen as part of the phenomenon of the datafication of the world and policy as numbers linked to other reforms of the state including new public management network governance and top down and test based modes of accountability This edited collection provides theoretically and empirically informed analyses of these developments This book was originally published as a special issue of the Journal of Education Policy The Future of Creation Order Gerrit Glas, Jeroen de Ridder, 2018-01-12 This work provides an overview of attempts to assess the current condition of the concept of creation order within reformational philosophy compared to other perspectives Focusing on the natural and life sciences and theology this first volume of two examines the arguments for and against the beauty coherence and order shown in the natural world being related to the will or nature of a Creator It

examines the decay of a Deist universe and the idea of the pre givenness of norms laws and structures as challenged by evolutionary theory and social philosophy It describes the different responses to the collapse of order that given by Christian philosophy scholars who still argue for the idea of a pre given world order and that of other scholars who see this idea of stable creation order and or natural law as redundant and in need of a thorough rethinking It studies the particular role that reformational philosophy has played in the discussion It shows how ever since its inception almost a century ago the concepts of order and law principle structure have been at the heart of this philosophy and that one way to characterise this tradition is as a philosophy of creation order Reformational philosophers have maintained the notion of law as holding for reality This book discusses the questions that have arisen about the nature of such law is it a religious or philosophical concept does law just mean orderliness How does it relate to laws of nature Have they always existed or do they emerge during the process of evolution
