Vanhullebusch,2021-10-05 This book comprehensively covers the entire scope of conflicting rights and duties of the fighting parties and international humanitarian relief actors in non international armed conflicts namely from the moment of the initiation of international humanitarian relief actions till their authorisation and throughout the consecutive stages of the delivery of relief From the practice of frontline humanitarian negotiations this book reconceptualizes how those rights and duties are coming into being and how compliance with agreements on humanitarian access and other international humanitarian law and international human rights norms can be ensured and or their normativity can be strengthened

Organizing for Disaster: Improving U.S. Foreign Humanitarian Assistance Operations ,2002 U S Government
USG agencies provide foreign humanitarian assistance FHA every year to disaster victims around the world The ability to rapidly provide humanitarian aid serves America s national interests but USG interagency coordination for FHA remains ad hoc at the operational level For its part the U S military is not fully prepared for the unique operational challenges of FHA Consequently valuable time is often lost improvising a USG response after a crisis occurs The operational level framework for a USG response must be in place before a foreign disaster strikes The principles and functions of FHA are distinctive at the operational level and participating USG agencies have unique roles and responsibilities for organizing FHA operations Unfortunately the lack of interagency guidance has promoted an ad hoc approach to organizing FHA operations that has hampered past relief efforts Several measures can be taken in order to better prepare for future FHA operations These include pre designating and training the Joint Task Force JTF commander and staff for FHA developing interagency doctrine for organizing FHA operations and over the long term forming a standing Joint Interagency Task Force JIATF for FHA

Navigating government documents is a task that requires considerable knowledge of specialized terms and acronyms This required knowledge nearly amounts to knowing a completely different language To those who are not fluent the task can be overwhelming as federal departments fill their documents with acronyms abbreviations and terms that mean little or nothing to the outsider Would you be able to make sense of a document that described how the COTR reports to the CO regarding compliance with FAR GPRSA SARA and FASA This is a common procedure in government contracting Would you have any clue what was being referred to if you came across MIL STD 129P It is the new standard for Military Shipping Label

Requirements The sheer number of such terms makes mastering them nearly impossible But now these terms and their definitions are within reach A Guide to Federal Terms and Acronyms presents a glossary of key definitions used by the Federal Government This reference guide is comprehensive covering the most common terms acronyms and abbreviations used by each major Federal Government agency And it is also accessible organized in a logical easy to use format Users can look up terms and acronyms by department or subject matter making this a quick reference for translating government language This is an essential tool for anyone who works with federal government information **Report on the Foreign Policy of the Czech Republic** ,2002-01-01 *International Humanitarian Assistance* Peter Macalister-Smith,2013-11-22

contemporary international humanitarian law IHL Against this backdrop authors were invited to reflect on the legal framework of humanitarian action and the ongoing relevance of fundamental humanitarian principles The Volume contains two chapters dedicated to the subject of humanitarian actors The first chapter argues in favour of the reconstruction of the laws of humanitarian assistance from the perspective of humanitarian practitioners while the second chapter foregrounds the role of the state as a key humanitarian actor The Volume further features two general submissions investigating the legality of toxic chemicals for law enforcement purposes under the Chemical Weapons Convention and the legal implications of tactical intelligence provision to a party to an international armed conflict The Volume as usual ends with a Year in Review section YIHL is a leading annual publication devoted to the study of IHL It has always strived to be at the forefront of the debate of pressing doctrinal questions of IHL As this Volume demonstrates it offers a space where IHL related issues can be explored both from a doctrinal and a theoretical perspective YIHL provides an international forum for high quality peer reviewed academic articles focusing on this crucial branch of international law Distinguished by contemporary relevance YIHL bridges the gap between theory and practice serving as a useful reference tool for scholars practitioners military personnel civil servants diplomats human rights workers and students *Globalization* Hector Cuadra-Montiel, 2012-08-22 The book *Globalization Approaches to Diversity* takes the ambitious undertaking of presenting a series of global issues that range from historic to contemporary from transnational to local and from cultural to institutional It consists of twelve chapters divided into three sections Globalization Agendas Globalization Policies Globalization Experiences Its authors embody a global research culture One that is plural growing and dynamic as it is evidenced in their respective agendas and methodological approaches The value of this book lies in its diversity and its merit will be appreciated by a global community of scholars Moral Vision in International Politics David Halloran Lumsdaine, 2020-12-08 Can moral vision influence the dynamics of the world system This inquiry into the evolving foreign aid policies of eighteen developed democracies challenges conventional international relations theory and offers a broad framework of testable hypotheses about the ways ethical commitments can help structure global politics For forty years development assistance has been the largest and steadiest net financial flow to the Third World far exceeding investment by multinational corporations Yet fifty years ago aid was unheard of Investigating this sudden and widespread innovation in the postwar political economy David Lumsdaine marshals a wealth of historical and statistical evidence to show that aid was based less on donor economic and political interests than on humanitarian convictions and the belief that peace and prosperity could be sustained only within a just international order Lumsdaine finds the developed countries adhered to rules that increasingly favored the neediest aid recipients and reduced their own leverage Furthermore the donors most concerned about domestic poverty also gave more foreign aid the U S aid effort was weaker than that of other donors Many lines of evidence how aid changed over time which donors contributed heavily where the money was spent who supported aid efforts converge to show how humanitarian

concerns shaped aid Seeking to bridge the gap between normative theory and empirical analysis Lumsdaine's broad comparative study suggests that renewed moral vision is a prerequisite to devising workable institutions for a post cold war world
