Beyond Books, Butts, and Buses Rebecca Good, 2014-03-18 *Beyond Books Butts and Buses* Ten Steps to Help Assistant Principals Become Effective Instructional Leaders is intended for ambitious future principals who recognize the importance of researching and preparing for that esteemed position. It contains ten steps that will lead those who are stuck in the duty world of books butts and buses to find ways to prepare for instructional leadership. This book lays out strategies, suggestions, and checklists that will help support the learning. There are scripts, organizational tools, and rationales for following through on the implementation of these steps. There are also samples of different types of walk-throughs, agendas, and planners to help one get and stay organized. A campus administrator position is a hectic crisis of the moment type of job, and these chapters address how to handle these moments or how to head them off. The need for balance in one's life is spoken to as well, with a chapter devoted to how to avoid burnout. This is a must-read for assistant principals serious about wanting to prepare themselves for the top position in a school.

Math for All Learners Pam Meader, Judy Storer, 2001-09-30 Worksheets and labs to get students to work together to solve real-world problems using geometry basic concepts.

Struggling Readers Lori Jamison Rog, 2014-01-17 The practical strategies in this insightful book show teachers how to give struggling readers the help they really need. *Struggling Readers* delivers advice on teaching that targets students' needs and offers kids opportunities to read texts that they can and want to read. It highlights explicit instruction and guided practice in comprehension. The book also, and perhaps most importantly, illustrates ways to help students build confidence in themselves as readers, writers, and thinkers.

Multiple Intelligences and Student Achievement Linda Campbell, Bruce Campbell, 1999-11-15 Finally a book about multiple intelligences (MI) theory that answers the questions that all educational innovations must ultimately address: What are the results on student achievement? How were those results achieved? *Multiple Intelligences and Student Achievement* describes six schools that have used MI theory for five or more years. Through case studies of two elementary, two middle level, and two high schools, Linda and Bruce Campbell illustrate why markedly different schools, large and small, rich and poor, inner city and suburban, looked to MI when they wanted to boost student learning. In schools with long-term MI programs, achievement gains are impressive; in fact, the disparity between white and minority students is reduced or eliminated. Students at all three levels outperform their district, county, and national peers in basic skills. Such gains are possible even though teachers do not teach to standardized and state assessment tests. Instead, they believe that all students have strengths and, as a result, students come to believe in themselves as well. Moreover, teachers have discovered that instruction through multiple intelligences is so positive and engaging that all students can help but learn. This book provides educators who are new to MI theory with solid achievement data and curricular formats to support, inform, and inspire their work. Those who have already worked with MI theory will find encouragement to continue and suggestions for refining their efforts.
