There will be a black Springbok over my dead body. Dr Danie Craven, President of the South African Rugby Board, 1969. Just a year after the controversial D. Oliveira affair, the organised disruption of the all-white 1969-70 South African rugby and cricket tours to Britain represented a significant challenge to apartheid politics. Led by future cabinet minister Peter Hain, the Stop the Seventy Tour campaign brought about the cancellation of both tours, presaging white South Africa's expulsion from the Olympics and the end of apartheid sport altogether. With his brand of attention-grabbing direct-action sports protest, the 19-year-old Hain emerged as a hero to some and an enemy to others. Now reflecting on these experiences with fifty years of hindsight, Lord Hain, together with South Africa's foremost sports historian and fellow anti-apartheid activist Andr  Odendaal, shows how decades of relentless international and domestic campaigning for equality led to a Springbok team captained by black athlete Siya Kolisi winning the 2019 Rugby World Cup. Interspersing a wide range of examples with personal testimony, *Pitch Battles* explores the themes of sport, globalisation and resistance from the deep past to the present day. Published in the same year as the *Stop The Tour* documentary from acclaimed director Louis Myles, this compelling story of sacrifice, struggle and triumph reveals how sport should never be divorced from politics or society's values.

**Podmiotowość agentów programowych w ujęciu teoretycznoprawnym** Rafał Michalczak, 2024-12-18. W monografii zaprezentowano teoretycznoprawne rozważania nad podmiotowością agenta w programowych, czyli programach komputerowych, które dzięki zastosowanym technologiom z zakresu sztucznej inteligencji wykazują zachowania nazywane autonomicznymi. Mogą przyjmować postać na przykład programów gier, dowodów lub programów odpowiedzialnych za sterowanie autonomicznymi pojazdami. Autonomia zachowania agenta w rodzaju problemu prawnego związane z przypisywaniem odpowiedzialności za konsekwencje działań. Pierwszym celem rozprawy jest udowodnienie egzystencji odrębności agenta od klasycznych programów, jest uzasadnione a w związku z tym dotychczasowe regulacje odnoszące się do programów nie odpowiadają na problemy specyficznie związane z agentami. Drugi cel to krytyczna analiza proponowanych w literaturze modeli rozwoju, zjawienia problemu w dotychczasowych przypisywalności odpowiedzialności prawnej. Koncentruje się ona na modelu upodmiotowienia agenta w programowych, postulując stworzenie nowej instytucji prawnej osoby elektronicznej oraz prezentuje zalety tego podejścia. Przedstawione poglądy i rozumowania stoją na wysokim poziomie naukowym, wiadczy o dużych zdolnościach i predyspozycjach autora do pracy naukowej, a także o znakomitym opanowaniu warsztatu naukowego oraz znajomości literatury przedmiotu. Wiele z prezentowanych przez niego wniosków ma charakter kontrowersyjny i prowokuje do polemiki, co w adnej mierze nie może rzutować na wysoką ocenę rozprawy. Potwierdza to raczej doniosłość i trudność poruszanych tu zagadnień wymagających doskonałej orientacji w wielu dziedzinach wiedzy oraz zdolności do samodzielnego krytycznego i nieschematycznego myślenia. Z recenzji prof. dr. hab. Tomasza Pietrzykowskiego.

*Liberation and Development* Leslie Anne Hadfield, 2016-05-01.

Liberation and Development Black Consciousness Community Programs in South Africa is an account of the community development programs of the Black Consciousness movement in South Africa. It covers the emergence of the movement's ideas and practices in the context of the late 1960s and early 1970s, then analyzes how activists refined their practices, mobilized resources, and influenced people through their work. The book examines this history primarily through the Black Community Programs organization and its three major projects: the yearbook *Black Review*, the Zanele Community Health Center, and the Njwaxa leatherwork factory. As opposed to better-known studies of antipolitical macroeconomic initiatives, this book shows that people from the so-called global South led development in innovative ways that promised to increase social and political participation. It particularly explores the power that youth, women, and churches had in leading change in a hostile political environment. With this new perspective on a major liberation movement, Hadfield not only causes us to rethink aspects of African history but also offers lessons from the past for African societies still dealing with developmental challenges similar to those faced during apartheid.

Over the past several decades, commercial air traffic has been growing at a far greater rate than airport capacity, causing airports to become increasingly congested. How can we accommodate this increased traffic and, at the same time, alleviate traffic delays resulting from congestion? The response outside the US has been to set a maximum number of slots and use administrative procedures to allocate these among competing airlines, with the most important consideration being grandfather rights to existing carriers. The United States, on the other hand, has used administrative procedures to allocate slots at only four airports. In all other cases, flights have been handled on a first-come, first-served basis, with aircraft queuing for the privilege of landing or taking off from a congested airport. While recognizing the advantages of slot systems in lessening delays, economists have criticized both approaches as being sub-optimal and have advocated procedures such as slot auctions, peak-load pricing, and slot trading to better utilize congested airports. Edited by an international team of air transport economists and drawing on an impressive list of contributors, *Airport Slots* provides an extremely comprehensive treatment of the subject. It considers the methods currently used to allocate slots and applies economic analysis to each. The book then explains various schemes to increase public welfare by taxing or pricing congestion and describes alternate slot allocation schemes, most notably slot auctions. In addition, *Airport Slots* outlines the complexities involved in slot allocation methods, including the requirement for multiple slots: a take-off slot at London Heathrow is useless unless there is a landing slot available at Frankfurt for a London-Frankfurt flight. Finally, the book explores the economic pitfalls of slot allocation schemes: for example, controls may not be required if external delay costs are internalized by a dominant carrier at its hub. *Airport Slots* provides a valuable contribution to the debate on how best to limit airport congestion. The book's comprehensive treatment of the subject matter provides the reader with a one-stop volume to explore airport congestion and
