Open for Business Richard Feinberg, 2016-06-14 An expert guide to Cuba's economic opening to the outside world. Ninety miles across the Straits of Florida, an exciting new revolution is afoot. This time instead of guerillas marching down the streets of Havana, it is a global economy that will upend Cuba. Now opening to the world, what new forms is this nascent economy likely to take? Open for Business: The New Cuban Economy Richard E. Feinberg's new book examines the Cuban economy as it makes its early steps into developing a more dynamic market economy. He examines key issues like the role foreign investors will play, how Cubans will forge a path to entrepreneurship, and the roadmaps suggested by other emerging economies. As Cuba's economy awakens from the post-Castro dream, it will do so with a flavor that is uniquely Cuban. Feinberg's book, enriched by interviews and in-depth field research conducted over the last five years, speaks both to Cuba's legacy and to its new horizons on the world stage. *2014 International Conference on Artificial Intelligence and Software Engineering (AISE2014)* S. K. Chen, Altair Engineering Inc., California, USA, Y. H. Chang, Chihlee Institute of Technology, Taiwan, 2014-02-06 2014 International Conference on Artificial Intelligence and Software Engineering AISE2014 aims to provide a forum for accessing to the most up-to-date and authoritative knowledge from both Artificial Intelligence and Software Engineering. AISE2014 features unique mixed topics of AI Algorithms, Data Mining, Knowledge-based Systems, Software Process, and so on. The goal of this conference is to bring researchers, engineers, and students to the areas of Artificial Intelligence and Software Engineering to share experiences and original research contributions on those topics. Researchers and practitioners are invited to submit their contributions to AISE2014. **Handbook of the Economics of Education**, 2023-01-18 The Handbook of the Economics of Education describes the research frontier in key topical areas and sets the agenda for further work. Modern analysis in the economics of education has made tremendous strides in understanding fundamental issues related to the production of human capital and the impact of varying institutional features of education systems. By bringing together some of the world's leading scholars, this volume provides a unique view of scholarship in the area. The international perspectives of the editors, Hanushek at Stanford, Machin at LSE, and Woessmann at Munich, leads to a volume with something for all researchers. Topics range from the economics of early childhood education to inequality in society to cash transfers in developing countries. Identification and evaluation of the state of the art. Clear descriptions of the meaning of existing research and the most likely avenues for the future. Insights into how policy interventions in education can help or hurt human capital outcomes. **The Anatomy of Corporate Law** Reinier Kraakman, John Armour, Paul Davies, Luca Enriques, Henry Hansmann, Gerard Hertig, Klaus Hopt, Hideki Kanda, Mariana Pargendler, Wolf-Georg Ringe, Edward Rock, 2017-01-19 This is the long-awaited third edition of this highly regarded comparative overview of corporate law. This edition has been comprehensively revised and updated to reflect the profound changes in corporate law and governance practices that have taken place since the previous edition. These include numerous

regulatory changes following the financial crisis of 2007-09 and the changing landscape of governance especially in the US with the ever more central role of institutional investors as active owners of corporations. The geographic scope of the coverage has been broadened to include an important emerging economy, Brazil. In addition, the book now incorporates analysis of the burgeoning use of corporate law to protect the interests of external constituencies without any contractual relationship to a company in an attempt to tackle broader social and economic problems. The authors start from the premise that corporations or companies in all jurisdictions share the same key legal attributes: legal personality, limited liability, delegated management, transferable shares, and investor ownership. Businesses using the corporate form give rise to three basic types of agency problems: those between managers and shareholders as a class, controlling shareholders and minority shareholders, and shareholders as a class and other corporate constituencies such as corporate creditors and employees. After identifying the common set of legal strategies used to address these agency problems and discussing their interaction with enforcement institutions, *The Anatomy of Corporate Law* illustrates how a number of core jurisdictions around the world deploy such strategies. In so doing, the book highlights the many commonalities across jurisdictions and reflects on the reasons why they may differ on specific issues. The analysis covers the basic governance structure of the corporation, including the powers of the board of directors and the shareholder meeting, both when management and when a dominant shareholder is in control. It then analyses the role of corporate law in shaping labor relationships, protection of external stakeholders, relationships with creditors, related party transactions, fundamental corporate actions such as mergers and charter amendments, takeovers, and the regulation of capital markets. *The Anatomy of Corporate Law* has established itself as the leading book in the field of comparative corporate law. Across the world, students and scholars at various stages in their careers, from undergraduate law students to well-established authorities in the field, routinely consult this book as a starting point for their inquiries.

OECD Economic Surveys: France 2017 OECD, 2017-09-14. GDP is set to grow fairly strongly in 2017-18, supported by private consumption and investment. The labour market has started to improve. However, productivity gains are too low to sustain social protection, high quality public services, and rising incomes in the long run.

[Handbook of Empirical Research on Islam and Economic Life](#) M. Kabir Hassan, 2016-12-30. In Islamic jurisprudence, a comprehensive ethic has been formulated governing how business and commerce should be run, how accountability to God and the community is to be achieved, and how banking and finance is to be arranged. This Handbook examines how well these values are translated into actual performance. It explores whether those holding true to the system are hindered and put at a disadvantage, or whether the Islamic institutions have been able to demonstrate that faith-based activities can be rewarding both economically and spiritually.

The Governance of Credit Rating Agencies Andrea Miglione, The global crisis revealed that credit rating agencies (CRAs) are capable of bringing about potential distortions in the financial sector, thereby resulting in a reduction in market confidence which in turn influences negotiations and expectations. CRAs need to be held accountable.

for lack of transparency and inaccurate ratings however the existing regulatory framework does not secure adequate investor protection This book provides a new and important contribution to research in the area at a crucial time in the debate around financial regulation and investment regimes Sovereign Credit Rating Ahmed Naciri,2016-12-19 The current degradation of sovereign balance sheets raises very real concerns about how sovereign creditworthiness is measured by credit rating agencies Given the disastrous economic and social effects of any downgrade the book offers an alternative and calls for more transparency about the quantitative measures used in calibrating the rating process and how sovereign ratings are validated It argues that oversight is required and procedures improved including subjecting methodologies of assessing default to more standardization and monitoring Sovereign Credit Rating explains the process of sovereign creditworthiness assessment and explores the consequences of possible inaccuracies in the process Developing an innovative new methodology to assess ratings accuracy it shows that the announcement of each rating action by the major credit rating agencies show alarming inconsistencies Written by an internationally recognized author and professor this unique book will be of interest to researchers and advanced students in corporate governance accounting public finance and regulation **Distance, Rating Systems and Enterprise Finance** Franz Flögel,2018-07-27 In response to the credit crunch during the global financial crisis of 2007 2008 many have called for the re establishment of regional banks in the UK and elsewhere In this context Germany's regional banking system with its more than 1 400 small and regional savings banks and cooperative banks is viewed as a role model in the financing of small and medium sized enterprises SMEs However in line with the death of distance debate the universal application of ICT based scoring and rating systems potentially obviates the necessity for proximity to reduce information asymmetries between banks and SMEs calling into question the key advantage of regional banks Utilising novel ethnographic findings from full time participant observation and interviews this book presents intimate insights into regional savings banks and compares their SME lending practices with large nationwide operating commercial banks in Germany The ethnographic insights are contextualised by concise description of the three pillar German banking system covering bank regulation structural and geographical developments and enterprise finance Furthermore the book advances an original theoretical approach that combines classical banking theories with insights from social studies of finance on the ontological foundation of new realism Ethnographic findings reveal varying distances of credit granting depending on the rating results i e large banks allocate considerable credit granting authority to local staff and therefore challenge the proximity advantages of regional banks Nevertheless by presenting case studies of lending to SMEs the book demonstrates the ability of regional banks to capitalise on proximity when screening and monitoring financially distressed SMEs and explains why the suggestion that ICT can substitute for proximity in SME lending has to be rejected

Third-Party Certifiers Jan De Bruyne,2019-07-12 Third Party Certifiers Jan De Bruyne Third party certifiers are organisations that are independent a requesting entity They attest that a product service information or person possesses

certain qualifications or meets safety quality or technical standards This important book presents an in depth analysis of the liability and obligations of certifiers evaluates existing certification processes in selected fields and proposes new mechanisms which could increase the accuracy and reliability of certifiers ratings marks or reports Highlighting the risks of errors in this activity inaccurate certification was a major factor in the global financial crisis of 2008 the author takes a comparative approach looking at the certification process in several European countries Australia and the United States Such aspects of the process as the following are thoroughly described obligations and liability of certifiers during the certification process risk of information asymmetry between the requesting entity and the end user and relationship between the civil liability of certifiers and public law aspects The analysis includes detailed research on key industries and jurisdictions and a specific proposed framework for more accurate and reliable certification Because the efficient and effective functioning of third party certifiers is extremely important in today s world especially in such areas as health the environment safety or economic values this deeply researched contribution to an important area of commercial law combining analysis of current issues with proposed reforms will be welcomed by practitioners when confronted with legal issues with regard to the certification process The book s conceptual framework will also prove highly useful for policymakers charged with developing reliable certification mechanisms
