

The report lists Andrew's traits and corresponding scores in descending order for each trait category. The trait definitions are to the right of each trait. If a position was selected when running this report, the traits related to the position will be highlighted in **green** for Essential Traits, **blue** for Desirable Traits, and **red** for Traits to Avoid that could hinder Andrew's performance.

The suitability assessment includes a technological 'consistency detector' that indicates the reliability of results by analyzing the consistency of the answers on the questionnaire. Andrew's consistency score is 96 which indicates that Andrew is 99% consistent in answering the questionnaire. This indicates a high likelihood that Andrew was truthful, accurately self-aware, and able to concentrate on the questionnaire.

A single asterisk, *, indicates that there are some inconsistencies related to this trait, but the result is probably reliable. A double asterisks, **, indicates that there are some inconsistencies related to this trait, and the result is probably questionable.

Principles of Assessment and Outcome Measurement for Occupational Therapists and Physiotherapists Alison Laver Fawcett, 2013-03-15 This textbook on assessment and outcome measurement is written for both occupational therapy and physiotherapy students and qualified therapists. It begins by defining what is meant by assessment, outcome evaluation and measurement and discussing the complexity of therapy assessment and measurement including the challenge of measuring human behaviour and the impact of factors such as task demand and context including the environment. Methods of data collection e.g. observation, interview, standardised testing and sources e.g. self-report, proxy for collecting information about clients are then reviewed and the main purposes of assessment e.g. descriptive, evaluative, predictive, discriminative presented. The book then addresses the topics of standardisation, levels of measurement, reliability, validity and clinical utility. There is a chapter describing and applying models for categorizing levels of function to aid assessment and measurement. The concept of clinical reasoning and reflective practice is then explored. Application of principles is supported through detailed case studies and worksheets and the criteria for test critique and guidelines for choosing a particular assessment approach are discussed.

A comprehensive account of cloze procedure is presented discussing its origin, different versions, its use for teaching and testing purposes as well as the latest research on cloze as measures of readability, language proficiency and second language reading. The book includes studies conducted at several stages on validating cloze as a measure of reading and interview and questionnaire techniques are applied to investigate the validity of eight cloze tests: criterion reading tests and other cloze and reading tests in general. Two new cloze tests, i.e. reader centered cloze test and phrase cloze test, are also introduced and researched as measures of reading ability.
