Cobb, 2002-02-01 The remarkable story of the Algebra Project a community based effort to develop math science literacy in disadvantaged schools as told by the program s founder Bob Moses was a hero of mine His quiet confidence helped shape the civil rights movement and he inspired generations of young people looking to make a difference Barack Obama At a time when popular solutions to the educational plight of poor children of color are imposed from the outside national standards high stakes tests charismatic individual saviors the acclaimed Algebra Project and its founder Robert Moses offer a vision of school reform based in the power of communities Begun in 1982 the Algebra Project is transforming math education in twenty five cities Founded on the belief that math science literacy is a prerequisite for full citizenship in society the Project works with entire communities parents teachers and especially students to create a culture of literacy around algebra a crucial stepping stone to college math and opportunity Telling the story of this remarkable program Robert Moses draws on lessons from the 1960s Southern voter registration he famously helped organize Everyone said sharecroppers didn t want to vote It wasn t until we got them demanding to vote that we got attention Today when kids are falling wholesale through the cracks people say they don t want to learn We have to get the kids themselves to demand what everyone says they don t want We see the Algebra Project organizing community by community Older kids serve as

coaches for younger students and build a self sustained tradition of leadership Teachers use innovative techniques And we see the remarkable success stories of schools like the predominately poor Hart School in Bessemer Alabama which outscored the city s middle class flagship school in just three years Radical Equations provides a model for anyone looking for a community based solution to the problems of our disadvantaged schools

National Science Foundation Directory of NSF-supported Teacher Enhancement Projects National Science Foundation (U.S.). Directorate for Science and Engineering Education, 1985 Encyclopedia of Educational Reform and Dissent Thomas C. Hunt, 2010-01-20 The history of American education is replete with educational reform and to a lesser extent educational dissent. Consider the present: you have various forms of privatization, school choice, the No Child Left Behind act, home schooling, value added, accountability, alternative teacher preparation programs, on-line instruction, etc. This range of activity is not exceptional. For instance, consider the past: progressive education, open education, the junior high school, the middle school, Life Adjustment education, career education, vocational education, the comprehensive high school, school-to-work, year-round schooling, behavioral objectives, proficiency exams, high stakes testing, whole language, learning packages and self-paced instruction, modular scheduling, site-based management, all presented as the way to reform American schools, at least in part. Then you have the reformers themselves, such as John Dewey, George Counts, Herbert Kohl, John Holt, Charles Silberman, Admiral Hyman Rickover, James Bryant Conant, all the way back to Horace Mann himself. Dissenters and dissenting movements, while not as numerous and certainly not as well known in educational circles, count the various faith-based schools and individuals such as Archbishop Hughes of New York. Clearly, this is an area rich in ideas, rife with controversy and vital in its outcome for individuals and the nation as a whole. And yet, strangely enough, there exists no major encyclopedia bringing the varied strands together in one place as a ready reference for scholars, teachers, school administrators and students studying to enter the educational profession. This two-volume work is intended to be that authoritative resource. Key themes and topics include biographies of reformers and dissenters, theoretical and ideological

perspectives key programs and legislation judicial verdicts impacting educational change in America the politics and processes of educational reform and policy making dissent and resistance to reform technology's impact on educational reform A Reader's Guide in the front matter groups entries around such themes to help readers find related entries more easily
