

# A Creepy short story

Once in a while I dream strange stuff. I fell like my dreams connect to an out-space reality somehow, but the strangest dream I have ever had is the one I am willing to describe you next:

< I didn't know I was **fast asleep** when all this started, but I was going to find it out pretty soon. I have a really good hearing, a musician one, it's called '**perfect pitch**'. I have developed my ear more through years (if possible), but I was born with this gift. As I do have it, when I was sleeping I could mix all my home sounds up within the sound of my sleeping brain.

I could feel a breeze, a cold one getting deep into my neck. There was no light at all, but a close dark instead....All of a sudden, a torch was turned on and I could appreciate gargoyles staring at me. I have to point out they were not stone gargoyles, but alive ones. Their skins were as grey as they are in our 'real' world, but they had a silver bright as if they were made of some sort of metallic material. As far as I knew I was surrounded by many of those creatures., I could not be less than petrified.

I started to scream with the hope there would be someone there to assist me, but there was no response. I was lonely. But nothing happened except that I heard then my husband saying:

-Hey honey, you're having a nightmare, wake up, please!

I heard him several times before I could understand I was in my dream, so I made a big effort to wake myself up, but couldn't. I tried to move my leg, but no success at all, not even my arms or my head moved. But I had suffered from **sleep paralysis** many times before, so I knew what had to be done.

People suffering from this disorder know well how scaring that experience can be, however, I am "well-used" to it and I tried my best to move one of my fingers, then the second, and so on... I could move at the end all my arm, and my body after; as it I would be a **Domino Rally racing set**.

I got up with a sudden gesture, jerking awake while I could distinguish my husband trying to calm me down. I was just dreaming...or wasn't I?>

**MetAphAs Test** Vicent Rosell-Clari, Carlos Hernández-Sacristán, 2018-02-13 El protocolo que aquí presentamos es el fruto de un encuentro interdisciplinar entre la psicología, el lenguaje, la logopedia y la lingüística, orientado al estudio de alteraciones del lenguaje de etiología central como son las afasias. Su objetivo de exploración es una dimensión de los hechos lingüísticos y de la facultad del lenguaje que a nuestro entender no ha sido atendida hasta el momento con la centralidad que merece. El examen de lo que designamos como habilidades metalingüísticas naturales nos ofrece una especial perspectiva sobre la fenomenología afásica que en ningún caso debe considerarse excluyente de otros posibles enfoques. El referido examen puede ser en efecto de utilidad para el desarrollo de criterios o instrumentos complementarios a los ya existentes en la evaluación y la rehabilitación de los trastornos del lenguaje y la comunicación. Nos referimos a las

habilidades sometidas a estudio como naturales para destacar el hecho de que se suelen poner en juego sin necesidad de instrucciones explícitas o una formación técnica previa lo que sería propio de un metalenguaje gramatical y de las tareas asociadas a este último. Bajo el rótulo habilidades metalingüísticas naturales atendemos una dimensión que cabe designar como meta cognitiva de los hechos de conducta verbal: esto es aquella que nos permite entender el lenguaje como un particular objeto de experiencia para su usuario y al mismo tiempo como instrumento comunicativo cuya puesta en juego se encuentra sometida a monitorización y control estratégico no necesariamente consciente o declarativo. Nos interesa en definitiva aproximarnos a ese tipo de factor que nos permite inscribir el lenguaje dentro del dominio de los procesos psicológicos superiores. Aunque difícil de definir en términos unívocos es justamente ese factor o componente el que desde nuestro punto de vista dota a la especificidad y singularidad a la conducta comunicativa humana y el que entendemos que en mayor o menor medida se encuentra afectado en una patología central del lenguaje como es la afasia.
