

Conclusion

The purpose of this research was to identify effective strategies for dealing with repetitive motions identified in individuals with Autism Spectrum Disorder. Based on the analysis conducted, it can be concluded that there are multiple behavior modification therapies important for the improvement of this behavior. Future exploration into behavior modification techniques could be useful to find further therapy techniques. The amount this could improve the lives of others with repetitive motion behaviors is worth exploring.

How to Write a Research Paper: A Guide Book for Neophyte Students Dr. Rashmee Yadav,2023-02-14 ABOUT THE BOOK The book How to write a Research Paper Guide book for neophyte students composed by three youngsters Dr Rashmee Yadav Dr Brij Vikash Singh and Dr Mithesh Verma is a fantastic effort in this direction They have covered almost all the areas of research paper writing process and how to write a research paper etc The book is based on the research paper writing process The author s main focused on this book How to write a Research Paper Guide Book for the neophyte students This book is helpful to students writing research paper in proper way because plenty of research papers are written every year But in many of them research methodology aspect is not given a considerable attention and because of which the research papers end up in just being endless words containing stories leading to less or no sense It should be noted that the

quality in research articles comes from the extensive planning and in depth research before starting writing them actually. This is true even for management research papers. Writing a research paper analyzes a perspective or argues a point. Regardless of the type of research paper the researcher is writing, the researcher should present his own thinking backed up by others' ideas and information. Research paper as a result of the research in the teaching of writing discussions with colleagues and own experiences. We have developed a detailed approach to writing research papers and the approach is presented here. Instead of focusing on one research paper, we have focused on the process of research writing through a series of shorter writing exercises. Students begin by having to carefully think about a topic of research and by developing a working idea. They then write a series of shorter essays that explore that topic. All along the way, students are continuing to research and revise their working proposal so that by the end of the term, their thinking about their original topic of research has evolved. This book, Writing the Research Paper by Philip M. McCarthy, Khawlah Ahmed, 2021-12-30, covers both theoretical and practical approaches. Writing the Research Paper guides students studying in English as a second or additional language through the skills necessary for success in university level writing and research. The book begins with theoretical considerations such as research argumentation and critical thinking. It then offers a broad range of practical assistance covering all aspects of the writing process, including topic selection, argument, counter argument, paragraph structure, and cohesion. The book is accompanied by a companion website, writingtheresearchpaper.com. The website hosts many features including chapter summaries, exercises, quizzes, PowerPoints, additional learning material, and technology assistance. The website also hosts numerous authentic examples of student papers at each of the critical stages of the writing process.
