Human Rights and Climate Change Julia Neumann,2011 Master s Thesis from the year 2010 in the subject Law Comparative Legal Systems Comparative Law grade B University of Auckland Law Faculty course Climate Change Law language English abstract This paper deals with the linkage of international human rights and climate change It focuses on the approach to deduce legal claims in the form of compensations and concrete measures from international human rights in the course of impairments through climate change This paper shall give a short overview on the issue climate change in general including its causes effects and the current political strategies It furthermore provides a synopsis on how human rights are impaired by global warming and climate change effects Unfortunately this essay will come to the conclusion that the international human rights approach struggles with functioning as a solitary legal basis in that context and with stepping beyond the just moral implication Human rights legislative potential rather lies in the development of more encompassing and more inclusive legal and political strategies Human rights may advisably be instrumentalized to strengthen political debates and be used as an incitement to set up enforceable and balanced agreements on reasonable measures of equalization and support

The Atlas of Climate Change Kirstin Dow,Thomas E. Downing,2016-05-04 This highly acclaimed atlas distills the vast science of climate change providing a reliable and insightful guide to this rapidly growing field Since the 2006 publication of the first edition climate change has climbed even higher up the global agenda This new edition reflects the latest developments in research and the impact of climate change and in current efforts to mitigate and adapt to changes in the world s weather The atlas covers a wide range of topics including warning signs vulnerable populations health impacts renewable energy emissions reduction personal and public action The third edition includes new or additional coverage of a number of topics including agreements reached in Copenhagen and Cancun ocean warming and increased acidity the economic impact of climate change and advantages gained by communities and business from adapting to climate change The extensive maps and graphics have been updated with new data making this edition once again an essential resource for everyone concerned with this pressing subject

Research Handbook on Climate Change, Migration and the Law Benoît Maye,François Crépeau,2017-10-27 This comprehensive Research Handbook provides an overview of the debates on how the law does and could relate to migration exacerbated by climate change It contains conceptual chapters on the relationship between climate change migration and the law as well as doctrinal and prospective discussions regarding legal developments in different domestic contexts and in international governance

Struggles for Climate Justice Brandon Barclay Derman,2020-03-14 This book provides an accessible but intellectually rigorous introduction to the global social movement for climate justice and addresses the socially uneven consequences of anthropogenic climate change Deploying relational understandings of nature society space and power Brandon Derman shows that climate change has been co

produced with social inequality Mismatching levels of responsibility and vulnerability and institutions that emerged in tandem with those disproportionalities compose the terrain on which NGOs and social movements now contest climate injustice in a wide ranging politics of connection Case based chapters explore the defining commitments of affected and allied communities and how they have shaped specific struggles mobilizing human rights international treaties transnational activist forums national and local constituencies and broad based demonstrations Derman synthesizes these cases and similar efforts across the globe to identify and explore crosscutting themes in climate justice politics as well as the opportunities and dilemmas facing advocates and activists and those who would ally with them going forward How should we understand campaigns for climate justice What do these initiatives share and what differentiates them What in fact does climate justice mean in these contexts And what do the framing and progression of such efforts in different settings suggest about the broader conditions that produce and sustain climate injustice how those conditions could be unmade and what might take their place Struggles for Climate Justice approaches these questions from an interdisciplinary perspective accessible to graduate and advanced undergraduate students as well as scholars of geography social movements environmental politics policy and socio legal studies

Climate Change, Human Impact and Green Energy Transformation Jan Kiciński, Patryk Chaja, 2021-07-23 This book indicates the most optimal solutions for the growing civilization problem related to climate change that takes place more and more rapidly on our planet It is divided into two parts In the first part the authors based on the available analyses and reports on climate change taking place on Earth present their own point of view in relation to the above issue while trying to find answers to the following questions Why is it so difficult to admit that humans are responsible for the ongoing climate change Will climate change destroy life on Earth Can science and modern technologies stop this process In the second part of the book the authors propose a solution for the advancing climate change regarding the reduction of CO2 emissions coming mainly from the energy sector On the basis of scientific achievements and implementations of research institutions in Poland especially the Institute of Fluid Flow Machinery of the Polish Academy of Sciences in Gdansk the book proposes directions of development of the energy transformation in Poland and other countries for which fossil fuels currently make a large contribution to the energy production process and are the main emitter of CO2 to the atmosphere The book is addressed to citizens ecologists climatologists as well as politicians and experts responsible for shaping the climate and energy policy of the country level and also the world

Climate Change and Justice Jeremy Moss, 2015-11-13 Achieving climate justice is increasingly recognized as one of the key problems associated with climate change helping us to determine how good or bad the effects of climate change are and whether any harms are fairly distributed The numerous and complex issues which climate change involves underline the need for a normative framework that allows us both to assess the dangers that we face and to create a just distribution of the costs of action This collection of original essays by leading scholars sheds new light on the key problems of climate justice offering innovative treatments of a range of issues including international environmental institutions geoengineering carbon budgets and the impact on future generations It will be a valuable resource for researchers and upper level students of ethics environmental studies and political philosophy

Netherlands Yearbook of International Law 2013 Mielle K. Bulterman, Willem J.M. van Genugten, 2014-05-23 The combination of the words international law and crisis is intriguing and leads to a number of questions How does international law react to crises and what are the typical conditions under which the term crisis is invoked Is international law a vivid field of law due to and thanks to crises Are parts of international law maybe in crisis themselves To what extent has the focus on crises taken away attention from important legal questions in the day to day application of international law And does the focus on crisis undermine analytic progress amongst scholars who might think about crises as being something completely new asking for new answers while ignoring the relevance of the existing international law acquis This volume includes eight articles in the domains of human rights law migration law environmental law international criminal law WTO law and European law reflecting upon these pertinent questions basically asking do

international lawyers do the things right or do they the right things The Netherlands Yearbook of International Law NYIL was first published in 1970 It offers a forum for the publication of scholarly articles of a more general nature in the area of public international law including the law of the European Union **The Routledge Handbook of Food Ethics** Mary

Rawlinson,Caleb Ward,2016-07-01 While the history of philosophy has traditionally given scant attention to food and the ethics of eating in the last few decades the subject of food ethics has emerged as a major topic encompassing a wide array of issues including labor justice public health social inequity animal rights and environmental ethics This handbook provides a much needed philosophical analysis of the ethical implications of the need to eat and the role that food plays in social cultural and political life Unlike other books on the topic this text integrates traditional approaches to the subject with cutting edge research in order to set a new agenda for philosophical discussions of food ethics The Routledge Handbook of Food Ethics is an outstanding reference source to the key topics problems and debates in this exciting subject and is the first collection of its kind Comprising over 35 chapters by a team of international contributors the Handbook is divided into 7 parts the phenomenology of food gender and food food and cultural diversity liberty choice and food policy food and the environment farming and eating other animals food justice Essential reading for students and researchers in food ethics it is also an invaluable resource for those in related disciplines such as environmental ethics and bioethics India's National Security
