educational values This aspect is especially relevant to promoting physical activity and its relationship with healthy habits such as the consumption of unprocessed foods the reduction of a sedentary lifestyle and the improvement of adherence to sports In this sense the World Health Organization warns that the current rates of overweight and obesity are very high and that we must combat them From formal education you can help improve healthy habits with educational programs and especially in Physical Education a subject where the work of physical social and cognitive well being has special relevance Since the 20th century studies and research that have aimed to combat unhealthy habits in educational centres and sports schools have increased Not only by promoting physical activity within the school but above all by seeking to generate adherence towards the future of students and athletes *Resources in Education* ,2001-10 **The Journal of Education** ,1913 *Science Education Partnerships* Art Sussman,1993 **The Frailty Myth** Colette Dowling,2001-11-06 Can women be equal to men as long as men are physically stronger And are men in fact stronger These are key questions that Colette Dowling author of the bestselling *The Cinderella Complex* raises in her provocative new book *The myth of female frailty* with its roots in nineteenth century medicine and misogyny has had a damaging effect on women s health social status and physical safety It is Dowling s controversial thesis that women succumb to societal pressures to appear weak in order to seem more feminine *The Frailty Myth* presents new evidence that girls are weaned from the use of their bodies even before they begin school By adolescence their strength and aerobic powers have started to decline unless the girls are exercising vigorously and most aren t By sixteen they have already lost bone density and turned themselves into prime candidates for osteoporosis They have also been deprived of motor stimulation that is essential for brain growth Yet as breakthroughs among elite women athletes grow more and more astounding it begins to appear that strength and physical skill for all women is only a matter of learning and training Men don t have a monopoly on physical prowess when women and men are matched in size and level of training the strength gap closes In some areas women are actually equipped to outperform men due partly to differences in body structure and partly to the newly discovered strengthening benefits of estrogen Drawing on extensive research in motor development performance assessment sports physiology and endocrinology Dowling presents an astonishing picture of the new physical woman And she creates a powerful argument that true equality isn t possible until women learn how to stand up for themselves physically *Language Arts* Pamela J.
