Human Resource Management System Project Documentation:

Human Resource Management in the Project-Oriented Organization Dr Martina Huemann, 2015-10-28 Organizations regularly assume that the culture values dynamic and organization of their temporary project organizations are merely a smaller version of the original parent. Given that project organizations are made up of people and teams drawn in most cases from outside and inside the parent, these assumptions are nonsensical. But they do explain why the HR function finds it difficult to adapt to the project environment. Martina Huemann's research in *Human Resource Management in the Project Oriented Organization* offers insight into an approach that is designed to align HR to the needs of the project organization in terms of management structure, reward, recruitment, and performance systems. The text analyses how the modern HR organization stacks up alongside the temporary organization that is the project to identify the HR constraints and needs of the project organisation and offer a model of project oriented HRM. Professor Huemann had a deep interest in how and why change processes come into existence and how to design and enable them. In her book, she endeavors to bridge theory and practice, strategy and operations.

Human Resource Management in the Project-Oriented Organization Martina Huemann, Anne Keegan, Rodney Turner, 2018-09-14 Human Resource Management (HRM) in project oriented organizations is a relatively unexplored topic though it is essential to the success of the organization and its competitive advantage. Project oriented organizations operate differently from classic business organizations in that they adopt temporary organizations in the form of projects and programs; therefore, the HRM approach they adopt should support this unique structure. *Human Resource Management in the Project Oriented Organization* takes a look at the multiple facets of HRM and how HRM should be applied in project oriented organizations. It is important for both human resource managers and project managers to adopt specific HRM practices and processes when working in project oriented organizations due to the effect these procedures have on employee perception of the work environment and the employment relationship. Through four in depth case studies over a spread of organizations, *Human Resource Management in the Project Oriented Organization* investigates the distinctive characteristics of project oriented organizations that lead to the need for specific HRM practices and considers the implications for organizations, projects, and individuals.
