

5 Something else you can do on the Edit screen is to pin your favourite widgets to the Home screen. By default, Weather and the Calendar's Up Next are always there, simply swipe up for the others.

7 To move a widget from its current place in your list, place your finger on the Three-line icon, on the right-hand side of the widget in question, and drag it into your preferred place. Rearrange as many as you like, and tap Done when you've finished.

6 On the Edit screen, you can rearrange the order of the Today widgets, and also move them into, or out of, the Pinned Favourites section, that is, the widgets that always appear on your Today screen without scrolling.

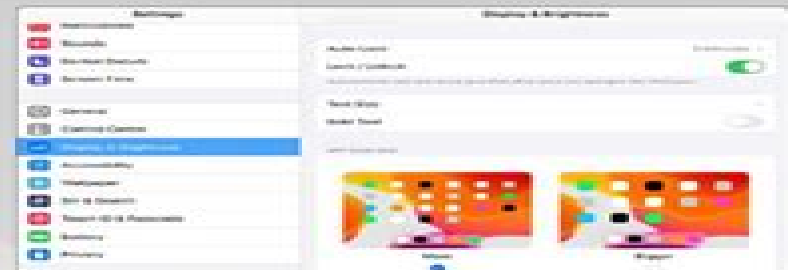

8 You can also remove a widget from the Today list altogether by tapping the minus sign to its left, or add a new one by tapping its plus sign. Some third-party apps offer widgets, so it's worth checking back frequently to make sure you're not missing anything.

More Apps Per Page.

1 By default, the new Home screen uses smaller app icons, allowing you to get more apps and folders onto a single screen. As you can see, there's now room for 30 items on a single screen, up from 20 items before.

2 If you dislike the tighter, more packed screen style, open the Settings app and tap Display & Brightness. Scroll to the bottom of the screen for the options: More, the new app arrangement, Bigger, the old style.
