Berman, Loukia Loukopoulos, 2017-03-02 Why would highly skilled well trained pilots make errors that lead to accidents when they had safely completed many thousands of previous flights The

majority of all aviation accidents are attributed primarily to human error but this is often misinterpreted as evidence of lack of skill vigilance or conscientiousness of the pilots

The Limits of Expertise is a fresh look at the causes of pilot error and aviation accidents arguing that accidents can be understood only in the context of how the overall aviation system operates

The authors analyzed in great depth the 19 major U S airline accidents from 1991 2000 in which the National Transportation Safety Board NTSB found crew error to be a causal factor

Each accident is reviewed in a separate chapter that examines events and crew actions and explores the cognitive processes in play at each step

The approach is guided by extensive evidence from cognitive psychology that human skill and error are opposite sides of the same coin

The book examines the ways in which competing task demands ambiguity and organizational pressures interact with cognitive processes to make all experts vulnerable to characteristic forms of error

The final chapter identifies themes cutting across the accidents discusses the role of chance criticizes simplistic concepts of causality of accidents and suggests ways to reduce vulnerability to these catastrophes

The authors complementary experience allowed a unique approach to the study accident investigation with the NTSB cognitive psychology research both in the lab and in the field enormous first hand experience of piloting and application of aviation psychology in both civil and military operations

This combination allowed the authors to examine and explain the domain specific aspects of aviation operations and to extend advances in basic research in cognition to complex issues of human performance in the real world

Although **The Limits of Expertise** is directed to aviation operations the implications are clear for understanding the decision processes skilled performance and errors of professionals in many domains including medicine

Applied and Systemic-Structural Activity Theory Gregory Z. Bedny,Inna S. Bedny,2019-07-05

This book presents new data in Applied Activity Theory AAT and Systemic Structural Activity Theory SSAT that can be used in the study of human performance

The SSAT is the high level generality theory that offers standardized principles of the analyses of human activity

These principles can be utilized in theoretical and applied studies

This multi contributed book offers a selection of works that will provide a holistic picture of the field

The new data can be utilized for the study of extremely complex human machine and human computer interaction systems and for evaluation of efficiency complexity and reliability of such systems at the design stage

Features Shows examples of self regulative models of various cognitive processes

Illustrates a method of study of production process in the construction industry

Includes topics on learning training and management

Covers a new method of computer based automated support of decision making under risk and uncertainty

Presents a new method of evaluation of probabilistic structure of tasks and the method of assessing reliability of human performance

Human-in-the-Loop Ephraim Suhir,2018-03-28

Improvements in

safety in the air and in space can be achieved through better ergonomics better work environments and other efforts of traditional avionic psychology that directly affect human behaviors and performance Not limited to just the aerospace field this book discusses adaptive probabilistic predictive modeling in human in the loop situations and gets you familiar with a new powerful flexible and effective approach to making outcomes from missions successful and safe Covers the concepts which are adaptable across other disciplines and methodology for evaluating the likelihood of a successful outcome of an extraordinary situation Considers human performance and equipment instrumentation reliability as well as other possible sources of uncertainty Presents probabilistic assessment of an aerospace mission outcome Provides the most effective physically meaningful and cost effective planning of an aerospace mission Offers how to organize and provide the most effective training of personnel
