Transformer Nick Lane, 2022-07-12 From the renowned biochemist and author of *The Vital Question* an illuminating inquiry into the Krebs cycle and the origins of life Nick Lane s exploration of the building blocks that underlie life s big fundamental questions the origin of life itself aging and disease have shaped my thinking since I first came across his work He is one of my favorite science writers Bill Gates What brings the Earth to life and our own lives to an end For decades biology has been dominated by the study of genetic information Information is important but it is only part of what makes us alive Our inheritance also includes our living metabolic network a flame passed from generation to generation right back to the origin of life In *Transformer* biochemist Nick Lane reveals a scientific renaissance that is hiding in plain sight how the same simple chemistry gives rise to life and causes our demise Lane is among the vanguard of researchers asking why the Krebs cycle the perfect circle at the heart of metabolism remains so elusive more than eighty years after its discovery *Transformer* is Lane s voyage as a biochemist to find the inner meaning of the Krebs cycle and its reverse why it is still spinning at the heart of life and death today Lane reveals the beautiful violent world within our cells where hydrogen atoms are stripped from the carbon skeletons of food and fed to the ravenous beast of oxygen Yet this same cycle spinning in reverse also created the chemical building blocks that enabled the emergence of life on our planet Now it does both How can the same pathway create and destroy What might our study of the Krebs cycle teach us about the mysteries of aging and the hardest problem of all consciousness *Transformer* unites the story of our planet with the story of our cells what makes us the way we are and how it connects us to the origin of life Enlivened by Lane s talent for distilling and humanizing complex

research Transformer offers an essential read for anyone fascinated by biology's great mysteries. Life is at root a chemical phenomenon; this is its deep logic.

Reviving the Living Yair Neuman, 2011-08-30

Reviving the Living: Meaning Making in Living Systems presents a novel perspective that relates to current biological knowledge and issues. Written by polymath Dr. Yair Neuman, the book challenges the dogmas that frame our understanding of living systems and presents a radical alternative approach to understanding the world around us, one that avoids the pitfalls of non-scientific perspectives such as Vitalism and Creationism. In this thought-provoking and iconoclastic manuscript, Neuman follows the footsteps of Gregory Bateson, Mikhail Bakhtin, Michael Polanyi, and others to suggest that living systems are meaning-making systems. The book delves into the unique processes of meaning-making that characterize organisms as a unique category of nature and offers new and fascinating insights into a variety of enigmatic biological phenomena, from immune memory to hidden life, cryptobiosis. It consists of four parts divided into 18 chapters and covers topics ranging from reductionism and its pitfalls to genetics, why organisms are irreducible, immunology, meaning-making in language and biology, meaning-bridging the gap between physics and semantics, context and memory, and the poetry of living. Core concepts and themes are illustrated using examples based in current science. This text would be of high interest to biologists, philosophers, cognitive scientists, psychologists, and semioticians, as well as to any reflective individual who is willing to examine the realm of the living from a novel and fascinating perspective.

Presents a novel perspective that relates to current biological knowledge and issues. Poses thought-provoking ideas for theoretical biologists, those studying philosophy of science and the mind, cognitive scientists, semioticians, and people involved with Artificial Intelligence. Includes examples based in current science to illustrate core concepts and themes.
