Creative Approaches to the Teaching of English: Secondary Robert Baird Shuman, 1974

Making Teaching and Learning Matter Judith Summerfield, Cheryl C. Smith, 2010-12-09

This volume captures the spirit of collaboration and innovation that its authors bring into the classroom as well as to groundbreaking undergraduate programs and initiatives. Coming from diverse points of view and twenty different disciplines, the contributors illuminate the often perplexing debates about what matters most in higher education today. Each chapter tells a unique story about creating vital pedagogical arenas that have the potential to transform teaching and learning for both faculty and students. These exploratory spaces include courses under construction, cross college and interdisciplinary collaborations, general education reform initiatives, and fresh perspectives on student support services, faculty development, freshman learning communities, writing across the curriculum, on-line degree initiatives, and teaching and learning centers. All these spaces lend shape to an overarching system-wide project bringing together the often disconnected silos of undergraduate education at The City University of New York (CUNY), America's largest urban public university system. Since 2003, the University's Office of Undergraduate Education has sponsored coordinated efforts to study and improve teaching and learning for the system's 260,000 undergraduates enrolled at 18 distinct colleges. The contributors to this volume present a broad spectrum of administrative and faculty perspectives that have informed the process of transforming the undergraduate experience. Combined, the voices in these chapters create a much-needed exploratory space for the interplay of ideas about how teaching and learning need to matter in evolving notions of higher education in the twenty-first century. In addition, the text has wider social relevance as an in-depth exploration of change and reform in a large public institution.

All Our Welfare Peter Beresford, 2016-01-29

The UK welfare state is under sustained ideological and political attack. It has also been undermined by accusations of paternalism and past failures to engage with the very people it is intended to help. This unique book is the first to critique the past, present and future welfare state from a participatory perspective. Peter Beresford, champion of user involvement, draws on pioneering theories and practice of welfare service user movements to offer a blueprint for a new participatory social policy. He controversially challenges orthodox

social policy and the limitations of both Fabian and Neo liberal perspectives in engaging people to improve their own welfare drawing on service users own ideas and experience including fascinating vignettes from his own family s experience to demonstrate the value of user knowledge Filling a much needed gap in the literature this accessible text will provide a great introduction for students and a road map for practitioners of an alternative vision for a future participatory and sustainable social policy It will also command much wider interest from everyone concerned with how we look after each other in future in society [The Bollywood Reader](#) Dudrah, Rajinder,Desai, Jigna,2008-10-01 Provides a road map of the scholarship on
