

## 8-1 Similarity in Right Triangles

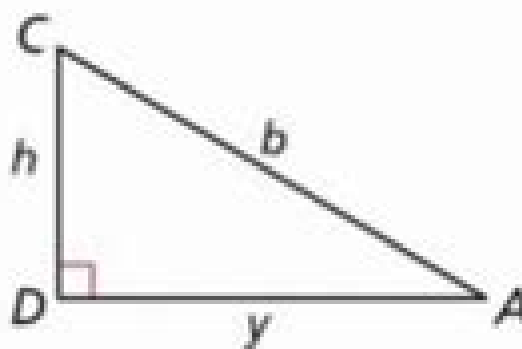

You can use Theorem 8-1-1 to write proportions comparing the side lengths of the triangles formed by the altitude to the hypotenuse of a right triangle.

All the relationships in red involve geometric means.

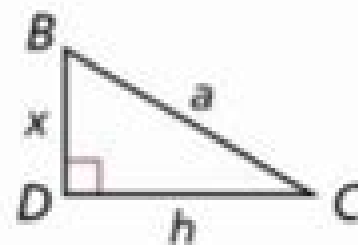

$$\frac{b}{a} = \frac{y}{h} = \frac{h}{x}$$

$\sim$

$$\frac{c}{a} = \frac{b}{h} = \frac{a}{x}$$

$\sim$

$$\frac{c}{b} = \frac{b}{y} = \frac{a}{h}$$

*The Upper Atmosphere in Motion* Colin O. Hines, 1974 Published by the American Geophysical Union as part of the Geophysical Monograph Series Volume 18 I am advised that a preface though not necessary would at least be conventional Since this provides the one opportunity for conventionality that the volume as a whole opens up it would be churlish of me to decline A preface normally includes I am told an indication of both the reason that underlies the volume's very existence and the individuals to whom the volume is directed But part of the reason for the volume's existence lies strange though it may seem in communicating the reason for the volume's existence Since prefaces generally go unread I would be remiss if I attempted that communication here Instead I have left the attempt to the Introduction and Key which I believe has a better chance of being read Let us be willing to settle for the moment on the truly fundamental fact that the volume was prepared because I was prepared to prepare it and a publisher was prepared to publish it As to the intended readers they too must wait for their identification in the Introduction and Key unless they are willing to settle at this point on an identification as those who might be ready to read what I was prepared to prepare
