Transformation resituates the practices of photography within contemporary sociological thinking. It examines how photography influences and shapes social order in the social media age and offers a methodological framework for studying transformation revealing the forms the process can take and the settings in which it occurs. Photography and the transformation it effects is conceptualised using actor network theory allowing it to be effectively studied in the context of globalisation and the rapid spread of mobile devices. Going beyond consideration of the images themselves, Maciej Fr ckowiak analyses the rituals and devices used to take them, the networks in which they circulate, conversations about them and institutional attempts to regulate their content. More than dead paper or a digital file or a visual representation, Photography as Social Transformation shows how photography is a complex social phenomenon, causal and capable of producing change. Offering case studies from around the world and drawing on a range of sources giving priority to media coverage from specialised and popular venues, Photography as Social Transformation is for students and scholars of the sociology of media, visual sociology, photographic methods in research, media and communications, cultural studies and photography theory.

Photography Mark Chen, Chelsea Shannon, 2020-05-31. Finally here is a photography textbook authored in the 21st century for 21st century audiences. Photography A 21st Century Practice speaks to the contemporary student who has come of age in the era of digital photography and social media where every day we collectively take more than a billion photographs. In addition, Photography A 21st Century Practice features 12 case studies from professional practice featuring established photographic artists and showcasing the techniques, concepts, modes of presentation and other professional concerns that shape their work.
