1e *Medical Emergency Teams* Michael A. DeVita,Ken Hillman,Rinaldo Bellomo,2007-07-03 Why Critical Care Evolved
METs In early 2004 when Dr Michael DeVita informed me that he was considering a textbook on the new concept of Medical
Emergency Teams METs I was surprised At Presbyterian University Hospital in Pittsburgh we introduced this idea some 15
years ago but did not think it was revolutionary enough to publish This even though our fellows in critical care medicine
training were all involved and informed about the importance of Condition C Crisis as it was called to distinguish it from
Condition A Arrest We thought it absurd to intervene only after cardiac arrest had occurred because most cases showed prior
deterioration and cardiac arrest could be prevented with rapid team work to correct precluding problems The above thoughts
were logical in Pittsburgh where the legendary Dr Peter Safar had been working since the late 1950s on improving current
resuscitation techniques first ventilation victims of apneic from drowning treatment of smoke inhalation and so on This was
followed by external cardiac compression upon demonstration of its efficiency in cases of unexpected sudden cardiac arrest
Dr Safar devoted his entire professional life to improvement of cardiopulmonary resuscitation He and many others
emphasized the importance of getting the CPR team to the hospital victims of cardiac arrest as quickly as possible

policy makers and researchers **Science and Practice of Pediatric Critical Care Medicine** Derek S. Wheeler, Hector R. Wong, Thomas P. Shanley, 2008-12-03 The field of critical care medicine is in the midst of a dramatic change. Technological and scientific advances during the last decade have resulted in a fundamental change in the way we view disease processes such as sepsis, shock, acute lung injury, and traumatic brain injury. Pediatric intensivists have been both witness to and active participants in bringing about these changes. As the understanding of the pathogenesis of these diseases reaches the cellular and molecular levels, the gap between critical care medicine and molecular biology will disappear. It is imperative that all physicians caring for critically ill children in this new era have a thorough understanding of the applicability of molecular biology to the care of these patients at the bedside in order to keep up with the rapidly evolving field of critical care medicine. To the same extent, the practice of critical care medicine is in the midst of fundamental change. In keeping with the Institute of Medicine's report *Crossing the Quality Chasm*, the care of critically ill and injured children needs to be safe, evidence-based, equitable, efficient, timely, and family-centered. 1, 2 In the following pages, these changes in our specialty are discussed in greater scope and detail, offering the reader fresh insight into not only where we came from but also where we are going as a specialty.

Critical Heart Disease in Infants and Children E-Book Ross M. Ungerleider, Kristen Nelson McMillan, David S. Cooper, Jon N. Meliones, Jeffrey Jacobs, 2018-09-26 Selected for Doody's Core Titles 2024 with Essential Purchase designation in Pediatric Surgery.
