Peasant Farming in Muscovy Robert E. F. Smith, 1977 This comprehensive study of farming methods and agrarian organization in Russia before the time of Peter the Great shifts the emphasis from the great estates to the basic production unit the peasant family farms and uses archaeological and ethnographic materials to supplement the documentary evidence The methods of production and the farm implements used are described in detail and Professor Smith argues that features inherent in peasant farming account for Russian backwardness during this period Part I classifies and describes the range of agrarian activities carried on in Muscovy arable farming hayfields livestock and gathering from the forest and presents a model of a hypothetical farm unit Part II examines three regions Moscow Toropets and Kazan which stretch across central European Russia and Part III provides a chapter on the relationship between peasant farming and the state

Future Trends of HPC in a Disruptive Scenario Lucio Grandinetti, Gerhard R. Joubert, Kristel Michielsen, Seyedeh Leili Mirtaheri, Michela Taufer, Rio Yokota, 2019-09-15 The realization that the use of components off the shelf COTS could reduce costs sparked the evolution of the massive parallel computing systems available today The main problem with such systems is the development of suitable operating systems algorithms and application software that can utilise the potential processing power of large numbers of processors As a result systems comprising millions of processors are still limited in the applications they can efficiently solve Two alternative paradigms that may offer a solution to this problem are Quantum Computers QC and Brain Inspired Computers BIC This book presents papers from the 14th edition of the biennial international conference on High Performance Computing From Clouds and Big Data to Exascale and Beyond held in Cetraro Italy from 2-6 July 2018 It is divided into 4 sections covering data science quantum computing high performance computing and applications The papers presented during the workshop covered a wide spectrum of topics on new developments in the rapidly evolving supercomputing field including QC and BIC and a selection of contributions presented at the workshop are included in this volume In addition two papers presented at a workshop on Brain Inspired Computing in 2017 and an overview of work related to data science executed by a number of universities in the USA parts of which were presented at the 2018 and previous workshops are also included The book will be of interest to all those whose work involves high performance computing
