Hurco Control Manual:

Beyond Taylorism Lorraine Giordano, 2016-07-27 This book explores two major contemporary changes in the workplace the impact of computerization on skills and the organization of production and the role of quality circles in the democratization of the workplace and the reorganization of bureaucratic decision making It is concerned with the labour processes which experience deskilling reskilling and shifts in the lines of demarcation between occupations Participation in quality circles raises issues of conflict rather than labour management cooperation and management's attempt to undermine collective bargaining agreements
