Accounting 221 Final Exam Review

Please note that I do not know what is on the exam and this is only a guide. Study on your own using the book, practice exam, class notes, homework, quizzes, OWIs etc.

Chapter 8 Accounting for Long-Term and Operational Assets

- **Tangible Asset:** Has physical presence. Include PP&E, Natural Resources, and Land
 - ✓ Remember: We **DO NOT** depreciate Land.
- **Intangible Asset:** Rights or Privileges. No Physical Presence. Includes patents, trademarks, copyrights, franchises, and goodwill. *(Patents, Copyrights, Trademarks, Franchises)*
- There are 2 types of intangibles, those with identifiable useful lives and those without. Only those with identifiable useful lives are amortized. *(Patents, Copyrights, Trademarks, Franchises)*
- How to Determine the cost of a long term asset:
 - ✓ Purchase Price + any costs necessary to get the asset in the location/condition for use
 - ✓ Includes sales tax, transit costs, title fees, realtor and attorney fees etc.
- **Basket Purchase Allocation:** buying multiple assets for one price
 - ✓ Step 1: Determine appraisal value for each asset
 - ✓ Step 2: Divide the appraisal value for each asset by the total appraisal value of the assets to get a percentage
 - ✓ Step 3: Multiply the % of each asset by the basket purchase price (what we paid)
 - ✓ Example: Purchased Building and Land for \$240,000. The appraisal value of the building was \$270,000 and the land was \$90,000 (the total being \$360,000).
 - Building: $\$270,000 / \$360,000 = 75\% \times \$240,000 = \$180,000$
 - Land: $\$90,000 / \$360,000 = 25\% \times \$240,000 = \$60,000$

Depreciation (How To)

Straight Line

- ✓ $(\text{Cost of Asset} - \text{Salvage Value}) / \text{Useful Life} = \text{Depreciation Expense per year}$

Double Declining

- ✓ Step 1: Divide 1 by the useful life of the asset to find the straight-line rate
- ✓ Step 2: Multiply the straight-line rate by 2 to find the Double-Declining Balance Rate
- ✓ Step 3: Multiply the net book value at the beginning of the period by the DDB Rate

Units of Production

- ✓ $(\text{Cost} - \text{Salvage Value}) / \text{Total Estimated Units of Production} = \text{Cost per unit}$
- ✓ $\text{Cost per Unit} \times \text{Units of Production in Current Year} = \text{Annual Depreciation Expense}$

*Accumulated Depreciation cannot exceed cost of the asset minus the salvage value. *

Difference between expenses and capital expenditures:

Expenses consist of maintenance and minor repairs.

Capital Expenditures:

- ✓ Improves Quality
 - Increases Asset's Historical Cost
- ✓ Extends Life
 - Decreases Accumulated Depreciation
 - Increases Remaining useful life

Law and the Political Economy of Hunger Anna Chadwick,2019-01-31 This book is an inquiry into the role of law in the contemporary political economy of hunger In the work of many international institutions governments and NGOs law is represented as a solution to the persistence of hunger This presentation is evident in the efforts to realize a human right to adequate food as well as in the positioning of law in the form of regulation as a tool to protect society from unruly markets In this monograph Anna Chadwick draws on theoretical work from a range of disciplines to challenge accounts that portray law s role in the context of hunger as exclusively remedial The book takes as its starting point claims that financial traders caused the 2007 8 global food crisis by speculating in financial instruments linked to the prices of staple grains The introduction of new regulations to curb the excesses of the financial sector in order to protect the food insecure reinforces the dominant perception that law can solve the problem Chadwick investigates a number of different legal regimes spanning

public international law international economic law transnational governance private law and human rights law to gather evidence for a counterclaim law is part of the problem The character of the contemporary global food system a food system that is being progressively financialized owes everything to law If world hunger is to be eradicated Chadwick argues then greater attention needs to be paid to how different legal regimes operate to consistently privilege the interests of the wealthy few over the needs of poor and the hungry
