Computational Science and Its Applications - ICCSA 2004 Antonio Laganà, Marina L. Gavrilova, Vipin Kumar, Youngsong Mun, C.J. Kenneth Tan, Osvaldo Gervasi, 2004-04-29 The natural mission of Computational Science is to tackle all sorts of human problems and to work out intelligent automata aimed at alleviating the burden of working out suitable tools for solving complex problems For this reason Computational Science though originating from the need to solve the most challenging problems in science and engineering computational science is the key player in the fight to gain fundamental advances in astronomy biology chemistry environmental science physics and several other scientific and engineering disciplines is increasingly turning its attention to all fields of human activity In all activities in fact intensive computation information handling knowledge synthesis the use of ad hoc

devices etc increasingly need to be exploited and coordinated regardless of the location of both the users and the various and heterogeneous computing platforms As a result the key to understanding the explosive growth of this discipline lies in two adjectives that more and more appropriately refer to Computational Science and its applications interoperable and ubiquitous Numerous examples of ubiquitous and interoperable tools and applications are given in the present four LNCS volumes containing the contributions delivered at the 2004 International Conference on Computational Science and its Applications ICCSA 2004 held in Assisi Italy May 14-17 2004 Introduction to CICS Dynamic Scripting Chris Rayns, George Bogner, Regis David, Yun Peng Ge, Guo Liang Huang, Guan Jun Liu, James O'Grady, Adam Rice, Dennis Weiand, Zhi Qiu Xie, Helen Xue, IBM Redbooks, 2011-06-30 IBM CICS Transaction Server Feature Pack for Dynamic Scripting embeds and integrates technology from WebSphere sMash into the CICS TS V4.1 run time helping to reduce the time and cost of CICS application development The Feature Pack provides a robust managed environment for a wide range of situational applications allowing PHP and Groovy developers to create reports dashboards and widgets and integrate CICS assets into mash ups and much more The CICS Dynamic Scripting Feature Pack combines the benefits of scripted Web 2.0 applications with easy and secure access to CICS application and data resources The Feature Pack includes a PHP 5.2 run time implemented in Java™ and with Groovy language support support for native Java code and access to many additional libraries and connectors to enhance the development and user experience of rich Internet applications Access to CICS resources is achieved by using the JCICS APIs In this IBM Redbooks publication we introduce the Dynamic Scripting Feature Pack show how to install and customize it and provide examples for using it **Introduction to Compiler Construction in a Java World** Bill Campbell, Swami Iyer, Bahar Akbal-Delibas, 2012-11-21 Immersing students in Java and the JVM this text enables a deep understanding of the Java programming language and its implementation It focuses on design organization and testing helping students learn good software engineering skills and become better programmers By working with and extending a real functional compiler students develop a hands on appreciation of how compilers work how to write compilers and how the Java language behaves Fully documented Java code for the compiler is accessible on a supplementary website *Software Engineering Research, Management and Applications* Roger Lee, 2014-11-01 This edited book presents scientific results of the 12th International Conference on Software Engineering Artificial Intelligence Research Management and Applications SERA 2014 held on August 31-September 4 2014 in Kitakyushu Japan The aim of this conference was to bring together researchers and scientists businessmen and entrepreneurs teachers engineers computer users and students to discuss the numerous fields of computer science and to share their experiences and exchange new ideas and information in a meaningful way Research results about all aspects theory applications and tools of computer and information science and to discuss the practical challenges encountered along the way and the solutions adopted to solve them This publication captures 17 of the conference's most promising papers

Web Services Liang-Jie Zhang, 2004-09-23 Welcome to the proceedings of the 2004 European Conference on Web Services ECOWS 2004 ECOWS is one of the leading international conferences focusing on Web services ECOWS 2004 was a forum for researchers and practitioners from academia and industry to exchange information regarding advances in the state of the art and practice of Web services identify emerging research topics and define the future directions of Web services computing ECOWS 2004 had a special interest in papers that contribute to the convergence of Web services Grid computing e business and autonomic computing and papers that apply techniques from one area to another This conference was called the International Conference on Web Services Europe in 2003 ECOWS 2004 was a sister event of the International Conference on Web Services 2004 ICWS 2004 which attracted more than 250 registered participants in San Diego USA Web services are characterized by network based application components and a service oriented architecture using standard interface description languages and uniform communication protocols Industrial application domains for Web services include business to business integration business process integration and management content management e sourcing composite Web services creation design collaboration for computer engineering multimedia communication digital TV and interactive Web solutions Recently Grid computing has also started to leverage Web services to define standard interfaces for business Grid services and generic reusable Grid resources The program of ECOWS 2004 featured a variety of papers on topics ranging from Web services and dynamic business process composition to Web services and process management Web services discovery Web services security Web services based applications for e commerce Web services based Grid computing and Web services solutions
