

Fiddle Tablature

Traditionally, the Fiddle does not use tablature like the Guitar, Banjo, Mandolin and Dobro. However, there is a way to incorporate tablature in Fiddle music.

Fiddle Tablature ('Tab', for short) looks a lot like Mandolin Tablature (4 lines representing the 4 string pairs), with the exception that, instead of the numbers representing the frets, the numbers represent the LEFT HAND FINGERS on the Fiddle. That really makes it very simple for someone that can not read regular music notation.

Position Markers

Most violin teachers place three (or more) small pieces of slender tape across the fingerboard of a first year student. These indicate where to place the 1st, 2nd, 3rd, and 4th fingers on the fingerboard. I used tapes for many years with my students but, I found that they slide around a lot and, in time, create a sticky mess on the fingerboard. I experimented a little bit and found placing small white dots of liquid paper or any other correction fluid on the fingerboard at the same positions. If the dots start to fade, I just put another dot on it!

If you are going to do this or use tape, these are the positions to place the markers on a FULL SIZE VIOLIN:

- 1st marker should be 1 $\frac{7}{16}$ inch (36 mm) from the nut (where the strings start to vibrate at the peg head)
- 2nd marker should be 2 $\frac{21}{32}$ inch (68 mm) from the nut.
- 3rd marker should be 3 $\frac{1}{4}$ inches (82 mm) from the nut.
- 4th marker (If you decide to add a marker for the 4th finger) will be 4 $\frac{1}{4}$ inches (108 mm) from the nut.

These measurements are for a full size violin. If you have a smaller fiddle, say, a $\frac{3}{4}$ or smaller, these marker positions will not work. They will be too far apart.

If you have a smaller fiddle, there is a formula called the 'Rule of 18' that will help you find your marks. It involves successively dividing the scale length (the distance between the bridge to the nut) minus the offset to the previous fret by 18. Below is an explanation of how this formula works:

1. With the instrument in tune and your bridge in the proper place (normally the bridge should have it's feet in line with the notches in the F holes), measure the length of the strings from the bridge to the nut. This is called the 'scale length'.

2. Divide this number by 17.817. If, for example, your scale length on your 'small' fiddle is 12 inches, you would divide $12 / 17.817 = .673$
