Organization and Alzheimer's Disease International have also proposed relatively mature guidelines for risk factors. However, there are still some influencing factors that have not yet formed a unified conclusion. In addition, there are fewer studies and no consensus on the influencing factors for MCI to NC. Current forms of intervention for MCI are mainly non-pharmacological interventions, and there is a lack of randomized controlled trials with larger sample sizes and longer intervention periods to confirm the effect of pharmacological and non-pharmacological interventions. The purpose of this study is to explore the factors that influence the transition from MCI to AD or NC in aging adults and to examine how the influencing factors make the cognitive function of aging adults with MCI deteriorate, improve, or even reverse to NC, and how their reversal rates. This includes effective measures proven through pharmacological and non-pharmacological intervention studies and their impact on reversal. Influence factors include but are not limited to demographic factors: age, socioeconomic status, education, lifestyle, smoking, alcohol consumption, physical activity, nutrition, social participation, mental health, depression, loneliness, diseases, hypertension, diabetes, sleep disorders, biological markers, amyloid, tau protein, and pharmacological factors: cholinesterase inhibitor, A monoclonal antibodies, drugs to rebalance the gut flora, etc. and submission of research results based on intervention trials is encouraged.

This book offers a straightforward practical guide to effective legal style from a world-leading expert. The book is thoughtfully structured to explain the elements of good legal writing and its most effective use. It catalogues all aspects of legal style: topic by topic, phrase by phrase, usage by usage. It scrutinises them all, suggesting improvements. Its dictionary arrangement makes it easy to navigate. Entries cover matters such as abbreviations, acronyms, active and passive voice, brackets, bullet points, citation methods, cross-referencing, fonts, document design, footnotes, gender-neutral language, numbering systems, plain legal language, punctuation, the use of Latin in law, structures for legal advice and documents, and techniques for editing and proofreading. Also covered are many words and phrases that non-lawyers find opaque and obscure, the aim being to show that lawyers can usually substitute a plain English equivalent that captures the legal nuances of the legalese.
