## **Learn The History Education Of History:**

**Why Learn History (When It's Already on Your Phone)** Sam Wineburg, 2018-09-17 A look at how to teach history in the age of easily accessible but not always reliable information Let's start with two truths about our era that are so inescapable as to have become clichés We are surrounded by more readily available information than ever before And a huge percent of it is inaccurate Some of the bad info is well meaning but ignorant Some of it is deliberately deceptive All of it is pernicious With the Internet at our fingertips what's a teacher of history to do In *Why Learn History When It's Already on Your Phone* professor Sam Wineburg has the answers beginning with this We can't stick to the same old read the chapter answer the question snoozefest If we want to educate citizens who can separate fact from fake we have to equip them with new tools Historical thinking Wineburg shows has nothing to do with the ability to memorize facts Instead it's an orientation to the world that cultivates reasoned skepticism and counters our tendency to confirm our biases Wineburg lays out a mine filled landscape but one that with care attention and awareness we can learn to navigate The future of the past may rest on our screens But its fate rests in our hands Praise for *Why Learn History When It's Already on Your Phone* If every K 12 teacher of history and social studies read just three chapters of this book Crazy for History Changing History One Classroom at a Time and Why Google Can't Save Us the ensuing transformation of our populace would save our democracy James W Lowen author of *Lies My Teacher Told Me* and *Teaching What Really Happened* A sobering and urgent report from the leading expert on how American history is taught in the nation's schools A bracing edifying and vital book Jill Lepore New Yorker staff writer and author of *These Truths* Wineburg is a true innovator who has thought more deeply about the relevance of history to the Internet and vice versa than any other scholar I know Anyone interested in the uses and abuses of history today has a duty to read this book Niall Ferguson senior fellow Hoover Institution and author of *The Ascent of Money* and *Civilization*

**Teaching History at University** Alan Booth, Jeremy Black, 2003 Drawing on a wide range of international research reflections and experiences of university historians this book links theory and practice and examines how high quality history teaching and learning can be achieved today in universities world wide

[History Education and Historical Inquiry](#) Bob Bain, Arthur Chapman, Alison Kitson, Tamara Shreiner, 2024-04-01 Inquiry plays a vital role in history as a discipline which constructs knowledge about the past and it is a vital organizing principle in history education in many countries around the world Inquiry is also much debated however and although it has prominent contemporary advocates around the world it also has prominent critics in education studies This volume in the *International Review of History Education* explores the role of historical inquiry in history curricula and in history classrooms and addresses a series of linked questions including the following What does historical inquiry mean in history classrooms What forms does classroom based historical inquiry take and to what extent is it understood in differing ways in different contexts What do we know about the affordances and constraints associated with inquiry based learning in history what is the evidence of the

effectiveness or ineffectiveness of inquiry based historical learning We address these questions in the volume by presenting seventeen papers from eight different international contexts exploring historical inquiry that will be of interest both to history teachers curriculum designers and history education researchers seven papers from England three from the US two from Sweden and one each from Argentina Australia Belgium Canada and Singapore The volume adds to our knowledge about teachers thinking about inquiry and teachers inquiry practices It adds to our knowledge about the impact and value of inquiry in developing children s historical learning It also explores the challenges that implementing inquiry can present for history teachers and provides support for implementation and examples of successful practice

**ENDORSEMENT** A wonderful overview of the global story of historical inquiry Canvassing everything from finding opportunities to teach history through all levels of education through to the complexities of navigating different views on the past inside and outside of the classroom History Education and Historical Inquiry provides a practical and empowering approach for educators around the world Recommended reading for anyone who wants to feel the support of educators from around the world in strengthening the place of inquiry in complex times Marnie Hughes Warrington University of South Australia

[In Search of America's Past](#) Bruce VanSledright, 2002-04-12 Offers alternatives to conventional textbook learning for history students describing the use of in depth historical projects and investigations that result in better retention of knowledge

[Learn the History](#) Peter Richardson, 2015-01-06 As parents we are in the best position to encourage our children s natural interest in history It is to us they address their first historical questions Where did I come from and Was I always here These two questions contain the two main meanings of history it is the story of people and events and it is the record of times past Follow this guide

[MasterClass in History Education](#) Christine Counsell, Katharine Burn, Arthur Chapman, 2016-10-06 MasterClass in History Education draws on international research and practice to present effective and engaging approaches for history teachers who want to explore the ways in which reading research and reflection can support the development of history teaching and learning in the classroom At the heart of the book is a series of professional enquiries carried out by experienced history teachers working in a range of contexts Each history teacher addresses clear questions arising from their practice and together they illustrate various approaches to data collection data analysis and argument These history teachers also show how they drew on diverse scholarship in history and history education including many publications by other history teachers In eight further chapters other experts ranging from practitioner scholars to researchers in diverse fields such as history history education teacher education teacher research and curriculum theory reflect on the distinctive insights that these teachers offer and explore connections with their own fields The combination of perspectives and the depth of knowledge of the varied contributors reveal the importance of different kinds of relationship between theory and practice The links between classroom realities and research and the critical use of different kinds of text will support history teachers in developing their practice and professional voice
