Cambridge International AS and A Level Mathematics: Mechanics 1 Coursebook Douglas Quadling, Julian Gilbey, 2016-07-14 Cambridge AS and A Level Mathematics is a revised series to ensure full syllabus coverage This coursebook has been revised and updated to ensure that it meets the requirements for the Mechanics 1 M1 unit of Cambridge AS and A Level Mathematics 9709 This revised edition adds clarifications to sections on forces and equilibrium kinematics of motion in a straight line and Newton's laws of motion All of the review questions have been updated to reflect changes in the style of questions asked in the course

Inequalities Shigeru Furuichi, 2020-01-15 Inequalities appear in various fields of natural science and engineering Classical inequalities are still being improved and or generalized by many researchers That is inequalities have been actively studied by mathematicians In this book we selected the papers that were published as the Special Issue Inequalities in the journal Mathematics MDPI publisher They were ordered by similar topics for readers convenience and to give new and interesting results in mathematical inequalities such as the improvements in famous inequalities the results of Frame theory the coefficient inequalities of functions and the kind of convex functions used for Hermite Hadamard inequalities The editor believes that the contents of this book will be useful to study the latest results for researchers of this field

An A-Z of Creative Teaching in Higher Education Sylvia Ashton, Rachel Stone, 2021-03-31 HE students rightly have high expectations of their lecturers and tutors As staff in HE adapt their teaching to fit the changing share of HE more support is needed This A Z guide is an essential resource to support those teaching in HE today to enhance their practice This text is a rich source of innovative approaches for learning and teaching in HE It addresses some common issues faced by lecturers in HE and includes case studies and practical suggestions for teaching The text takes a critical approach to exploring themes from different perspectives and highlights important and recent theory in the field This second edition includes more content on teaching and learning online a new chapter on decolonising the curriculum and many more updates throughout

Rail Transport—Systems Approach Aleksander Ślaskowski, 2017-03-08 This book shows how the systems approach is employed by scientists in various countries to solve specific problems concerning railway transport In particular the book describes the experiences of scientists from Romania Germany the Czech Republic the UK Russia Ukraine Lithuania and Poland For many of these countries there is a problem with the historical differences between the railways In particular there are railways with different rail gauges with different signaling and communication systems with different energy supplies and finally with different political systems which are reflected in the different approaches to the management of railway economies The book's content is divided into two main parts the first of which provides a systematic analysis of individual means of providing and maintaining rail transport In turn the second part addresses infrastructure and management development with particular attention to security issues Though primarily written for professionals involved in various problems concerning railway transport the book will also benefit manufacturers railway technical staff managers and

students with transport specialties as well as a wide range of readers interested in learning more about the current state of transport in different countries STEM Road Map Carla C. Johnson, Erin E. Peters-Burton, Tamara J. Moore, 2015-07-03

STEM Road Map A Framework for Integrated STEM Education is the first resource to offer an integrated STEM curricula encompassing the entire K 12 spectrum with complete grade level learning based on a spiraled approach to building conceptual understanding A team of over thirty STEM education professionals from across the U S collaborated on the important work of mapping out the Common Core standards in mathematics and English language arts the Next Generation Science Standards performance expectations and the Framework for 21st Century Learning into a coordinated integrated STEM education curriculum map The book is structured in three main parts Conceptualizing STEM STEM Curriculum Maps and Building Capacity for STEM designed to build common understandings of integrated STEM provide rich curriculum maps for implementing integrated STEM at the classroom level and supports to enable systemic transformation to an integrated STEM approach The STEM Road Map places the power into educators hands to implement integrated STEM learning within their classrooms without the need for extensive resources making it a reality for all students *Diversity, Equity, and Inclusion for Mathematics and Science Education: Cases and Perspectives* Lin, Cheng-Yao, Sun, Li, 2025-06-04

Diversity equity and inclusion DEI are critical pillars for transforming mathematics and science education As classrooms diversify the need to address systemic barriers and create inclusive learning environments becomes more urgent Cases on DEI in STEM education highlight the real world challenges and strategies educators face in promoting equitable access to learning opportunities dismantling biases and empowering students from historically marginalized communities Further exploration may reveal powerful teaching tools and catalyze reflective practice and institutional change encouraging educators to critically examine their roles in shaping a more inclusive future in math and science Cases on Diversity Equity and Inclusion for Mathematics and Science Education explores key issues and concepts related to diversity equity and inclusion in mathematics and science classrooms It offers solutions and successful strategies for teaching and learning in mathematics and science This book covers topics such as inclusive classrooms K 12 education pre service teaching and is a useful resource for educators sociologists academicians researchers and scientists *Recent Research On Domination Related Parameters* Dr. D. D. Pandya, 2021-09-05

In this thesis we have discussed variants of domination like vertex covering Independent domination K domination K dependent set K dependent K domination Total domination Extended total domination K tuple domination Total K domination Restrained domination and Total restrained domination We have characterized edges whose removal affects or does not affect these variants We have also discussed changing and unchanging of these variants in terms of edge addition between two non adjacent vertices From history we can see that much work has been done for critical graphs but existing work is related to all edges of graph But for application point of view sometimes we require to delete or add any particular edge So our work is related to any particular edge but it is applicable for all graphs When existing work

for critical graphs is applicable for any edge but in some particular graph In this way our results carry more important when any particular edge is to be focused We have also discussed bondage number for some variants Our results are related to relation between vertices and edges whose removal affects all these variants Many research papers have been published for criticalness of graph with respect to vertex removal So our results may be link between vertices and edge removal It will insist many research scholars to do work in this direction We believe our study will become instrumental in making the relation between edge removal and vertex removal more transparent and effectively We hope our thesis provide row material for other research scholars of engineering field also
