

PHYSICS TOPIC 1- MOVING ABOUT

1. Vehicles do not typically travel at a constant speed

Identify that a typical journey involves speed changes

Distinguish between the instantaneous and average speed of vehicles and other bodies

- Speed is the rate of change of distance over time, a measure of how quickly distance is covered
- In typical journey in any form of transport, it involves starting, stopping and possible speed changes throughout the journey. Hence, our speed is rarely constant in a journey

$$V_{av} = \frac{D_{total}}{T_{total}}$$

V_{av} = average speed
 D_{total} = total distance covered
 T_{total} = total time taken

- Average speed is how quickly a total distance is covered over a total time
- Instantaneous speed is the speed of an object at any given point. Instantaneous speed is more accurate since in reality speed is constantly changing over a journey
- Eg) A car starts at rest, the travels at 30km/h for the first hour, then at 60km/h for the second hour
 - The instantaneous speed:
 At the beginning: 0km/h
 After half an hour: 30km/hr
 - Average speed of entire trip = 90km/2hr = 45km/h

Distinguish between scalar and vector quantities in equations

- There are two types of quantities in physics:
 - Scalar quantity: has magnitude only
 - Vector quantity: has both magnitude and direction
- When dealing with vectors, the direction must also be stated in answers

Scalar	Vector
Distance	Displacement
Speed	Velocity
Volume	Acceleration
Mass	Fields
Length	Forces

Descartes and the Modern Gordon McQuat, Neil Robertson, Tom Vinci, 2009-03-26 Descartes is not simply our iconic modern philosopher mathematician or scientist He stands as the cultural symbol for modernity itself As such Descartes is widely read in and out of universities as the definitive moment in the birth of what we take to be the Modern Yet recent scholarship has presented numerous challenges to the Cartesian image Some question the legitimacy of calling Descartes a founder of modernity Others have questioned the very legitimacy of Modernity itself using Descartes as a way into that critique This collection of original papers by leading philosophers and historians of early modern thought opens up these

questions exploring them in new and markedly interdisciplinary ways offering fresh insights into the important relationship between Descartes and the Modern and the very meaning and status of Modernity itself This collection assembles together for the first time leading representatives from what might be called the naturalist or Anglo American school with those of the continental phenomenological school in a dialogue concerning Descartes place The papers explore crucial questions and recent disputes regarding Descartes relationship to his predecessors to his contemporaries and to modern thought to the philosophy of mind to questions of metaphysics and natural philosophy Descartes and the Modern helps bridge solitudes drawn between these traditional approaches to Descartes
