South African Schooling: The Enigma of Inequality Nic Spaull, Jonathan D. Jansen, 2019-11-05 This volume brings together many of South Africa s leading scholars of education and covers the full range of South African schooling from financing and policy reform to in depth discussions of literacy numeracy teacher development and curriculum change The book moves beyond a historical analysis and provides an inside view of the questions South African scholars are now grappling with Are there different and preferential equilibria we have not yet thought of or explored and if so what are they In practical terms how does one get to a more equitable distribution of teachers resources and learning outcomes While decidedly local these questions resonate throughout the developing world South Africa today is the most unequal country in the world The richest 10% of South Africans lay claim to 65% of national income and 90% of national wealth This is the largest 90 10 gap in the world and one that is reflected in the schooling system Two decades after apartheid it is still the case that the life chances of most South African children are determined not by their ability or the result of hard work and determination but instead by the colour of their skin the province of their birth and the wealth of their parents Looking back

on almost three decades of democracy in South Africa it is this stubbornness of inequality and its patterns of persistence that demands explanation justification and analysis This is a landmark book on basic education in South Africa an essential volume for those interested in learning outcomes and their inequality in South Africa The various chapters present conceptually and empirically sophisticated analyses of learning outcomes across divisions of race class and place The book brings together the wealth of decades of research output from top quality researchers to explore what has improved what has not and why Prof Lant Pritchett Harvard University There is much wisdom in this collection from many of the best education analysts in South Africa No surprise that they conclude that without a large and sustained expansion in well trained teachers early childhood education and adequate school resources South Africa will continue to sacrifice its people s future to maintaining the privileges of the few Prof Martin Carnoy Stanford University Altogether one can derive from this very valuable volume if not an exact blueprint for the future then certainly at least a crucial and evidence based itinerary for the next few steps Dr Luis Crouch RTI

Psychosocial Pathways Towards Reinventing the South African University
Sabrina Liccardo, 2020-11-02 This book proposes a conceptual empirical framework for exploring forms of continuity and change along psychosocial pathways in South African universities It illustrates how the psychosocial pathways are grounded in the symbolic narratives and knowledges of young scientists engineers and architects all interlocutors in the research from which this book is based Alala Mamoratwa Welile Odirile Kaiya Amirah Takalani Nosakhele Naila Ambani Khanyisile Itumeleng Ethwasa and Kgnaya provide collective standpoints in the multiplicities within and between the lived lives and told stories of young Black South African women in Science Technology Engineering and Mathematics STEM fields In doing so this compelling work advances possibilities for demythologising scientific endeavour as a white male achievement and shifting knowledge communities across gendered racialised class and national divides This book presents an innovative narrative methodology utilising the myth of the Minotaur to examine the state of the university at the heart of the hierarchical labyrinth in post apartheid South Africa Throughout the work the author wrestles with and self reflexively highlights her own positionality as a white middle class South African woman to examine how this affects the production of this research in ways which serve to preserve the colonial knowledge system With the rise of the Rhodes Must Fall and Fees Must Fall student movement in South Africa demanding for the fall of institutionalised racial hierarchies the author uses the cover image of narrative formations in the spirit of exploration to think with and through undulating networked forms that could possibly forge new psychosocial pathways towards decolonising and reinventing South African universities This work offers a unique conceptual and methodological resource for students and scholars of psychosocial and narrative theory as well as those who are concerned about the politics of higher education both in South Africa and in other contexts around the world

The Education Triple Cocktail Brahm Fleisch, 2018-08-15 The Education Triple Cocktail brings together rigorous quantitative and qualitative research on a new approach to improving foundational teaching and learning for schoolchildren

living in working class poor and remote rural communities in resource constrained systems like South Africa At the core of this book is the theory and evidence for a powerful new interlocking and mutually reinforcing change model Inspired by the AIDS treatment story the three pronged approach of structured daily lesson plans appropriate and high quality educational materials and one on one instructional coaching to help teachers transform their instructional practices in early grade classrooms shows that it will improve learning outcomes For education systems defined by low levels of early grade learning and profoundly unequal outcomes The Education Triple Cocktail offers a theoretically informed evidence based way forward This book will be of immense use to teachers students of Education policymakers and parents *Improving Learning in South African Schools* Cas H. Prinsloo, 2005 The QLP has been a multi level multi site educational intervention that aimed to improve learner performance in 524 South African high schools The QLP has been underpinned by the principle that mathematics and language are the foundations for all further learning Therefore educators at all grades in all learning areas also have to foster the development of better reading and writing skills This is why at educator and classroom level improvement of mathematics and reading and writing abilities have been the main foci of the QLP In order to ensure that schools get effective support and monitoring from districts and that the good practices gained from the project are institutionalised and therefore sustained the programme has also focused on the development of district systems and officials
