Safety Management Systems in Aviation Alan J. Stolzer, John J. Goglia, 2016-03-03 Although aviation is among the safest
modes of transportation in the world today accidents still happen In order to further reduce accidents and improve safety
proactive approaches must be adopted by the aviation community The International Civil Aviation Organization ICAO has
mandated that all of its member states implement Safety Management System SMS programs in their aviation industries
While some countries the United States Australia Canada members of the European Union and New Zealand for example
have been engaged in SMS for a few years it is still non existent in many other countries This unique and comprehensive
book has been designed as a textbook for the student of aviation safety and as an invaluable reference tool for the SMS
practitioner in any segment of aviation It discusses the quality management underpinnings of SMS the four components risk
management reliability engineering SMS implementation and the scientific rigor that must be designed into proactive safety
The authors introduce a hypothetical airline oriented safety scenario at the beginning of the book and conclude it at the end
engaging the reader and adding interest to the text To enhance the practical application of the material the book also
features numerous SMS in Practice commentaries by some of the most respected names in aviation safety In this second
edition of *Safety Management Systems in Aviation* the authors have extensively updated relevant sections to reflect
developments since the original book of 2008 New sections include a brief history of FAA initiatives to establish SMS data
driven safety studies developing a system description SMS in a flight school and measuring SMS effectiveness Defense
