Events and Urban Regeneration Andrew Smith, 2012-03-15 In recent years major sporting and cultural events such as the Olympic Games have emerged as significant elements of public policy particularly in efforts to achieve urban regeneration As well as opportunities arising from new venues these events are viewed as a way of stimulating investment gaining civic engagement and publicizing progress to assist the urban regeneration process more generally However the pursuit of regeneration involving events is a practice that is poorly understood controversial and risky *Events and Urban Regeneration* is the first book dedicated to the use of events in regeneration It explores the relationship between events and regeneration by analyzing a range of cities and a range of sporting and cultural events projects It considers various theoretical perspectives to provide insight into why major events are important to contemporary cities It examines the different ways that events can assist regeneration as well as problems and issues associated with this unconventional form of public policy It identifies key issues faced by those tasked with using events to assist regeneration and suggests how practices could be improved in the future The book adopts a multi disciplinary perspective drawing together ideas from the geography urban planning and tourism literatures as well as from the emerging events and regeneration fields It illustrates arguments with a range of international case studies placed within and at the end of chapters to show positive outcomes that have been achieved and examples of high profile failures This timely book is essential reading for students and practitioners who are interested in events urban planning urban geography and tourism

Significant Event Audit Jonathan Stead, 2001-01-11 Nobody does their job perfectly and no system of care gives ideal outcomes We need to recognise and remember the continuum of quality from poor care to the best care that in reality means a better than the average Everybody can improve some need to improve more than others If clinical governance is to be effective in improving care for all people who use the health service it must have tools that engage clinicians managers and teams at all points on the continuum There will be many tools including monitoring and feedback conventional auditing academic detailing continuing professional development and risk management One methodology is emerging as being effective in many teams and in uniting all the disparate elements of clinical governance significant event auditing It includes all team members doctors nurses managers allied health professionals and receptionists in the pursuit of quality It is non judgemental but rigorous It works with the existing culture And most importantly is enjoyable The real strength of significant event auditing lies in harnessing the emotional content of cases through a structured process to achieve real changes In my general practice we regularly audited the number of people with diabetes who had had their retina examined in the past year

The numbers hung around the 50% mark year after year and at each audit discussion we vowed to do better When we discussed the case of an elderly woman living alone who had been diagnosed with advanced diabetic retinopathy it all came to life for us The commitment to retinal screening was hugely enhanced Those teams that have not taken up significant event auditing and those primary care groups or trusts that are not encouraging it need practical guidance This book is exactly the guidance they seek It explains the background evidence and context And it gives practical support to those interested in establishing it where they work

Eventful Cities Greg Richards, Robert Palmer, 2012-05-31 Processes of globalization economic restructuring and urban redevelopment have placed events at the centre of strategies for change in cities Events offer the potential to achieve economic social cultural and environmental outcomes within broader urban development strategies This volume analyzes the process of cultural event development management and marketing and links these processes to their wider cultural social and economic context provides a unique blend of practical and academic analysis with a selection of major events and festivals in cities where eventfulness has been an important element of development strategy examines the reasons why different stakeholders should collaborate as well as the reasons why cities succeed or fail to develop events and become eventful Eventful Cities evaluates theoretical perspectives and links theory and practice through case studies of cities and events across the world Critical success factors are identified which can help to guide cities and regions to develop event strategies This book is essential reading for any undergraduate or graduate student and all practitioners and policy makers involved in event management cultural management arts administration urban studies cultural studies and tourism
