OECD Reviews of Evaluation and Assessment in Education: Georgia Li Richard Ruochen, Kitchen Hannah, George Bert, Richardson Mary, Fordham Elizabeth, 2019-12-19 This review developed in partnership with UNICEF provides Georgia with recommendations to strengthen its evaluation and assessment system to focus on helping students learn It will be of interest to countries that wish to strengthen their own evaluation and assessment systems and in turn improve educational outcomes

Meeting the Challenges to Measurement in an Era of Accountability Henry Braun, 2016-01-29 Under pressure and support from the federal government states have increasingly turned to indicators based on student test scores to evaluate teachers and schools as well as students themselves The focus thus far has been on test scores in those subject areas where there is a sequence of consecutive tests such as in mathematics or English language arts with a focus on grades 4 8 Teachers in these subject areas however constitute less than thirty percent of the teacher workforce in a district Comparatively little has been written about the measurement of achievement in the other grades and subjects This volume seeks to remedy this imbalance by focusing on the assessment of student achievement in a broad range of grade levels and subject areas with particular attention to their use in the evaluation of teachers and schools in all It addresses traditional end of course tests as well as alternative measures such as portfolios exhibitions and student learning objectives In each case issues related to design and development psychometric considerations and validity challenges are covered from both a generic and a content specific perspective The NCME Applications of Educational Measurement and Assessment series includes edited volumes designed to inform research based applications of educational measurement and assessment Edited by leading experts these books are comprehensive and practical resources on the latest developments in the field The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license

Conflicts in History Education in Europe Ander Delgado, Andrew Mycock, 2023-07-01 The heightened resonance of identity driven politics in many states across twenty first century Europe emphasizes the critical role of history in shaping public contestation of the idea of the nation and accordant manifestations of nationalism and national identity How the past is interpreted or what and how is remembered has proven increasingly febrile contentious and divisive Debates about history have gone beyond academia and have permeated and polarised politics and society in many European countries Intense debate and dispute about national history and culture has often focused on the history teaching

in schools colleges and universities According to the aforementioned it is evident that the teaching of history in the classroom is a relevant topic within the educational system For this reason it is not surprising that many times the choice of what kind of history to teach becomes a controversial topic The existence in a given society of different visions about the nation or the various responses proposed to face the social challenges existing in it immigration independence nationalisms can turn the teaching of history into a debated and controversial topic Logically depending on the specific political context of each country this debate can acquire different developments and characteristics The school is not an institution isolated from its socio political context In fact both areas constantly interact Therefore this book proposes an approach to this topic that tries to connect the specific political context of different countries with the debates about education and history teaching from 1990 until the present It deals with the extent to which the social and political context affects the history teaching practice developed in the classrooms through the decisions made on the official curricula and textbooks Emphasizing this connection between both aspects is one of the strengths of this book That is the reason why this book proposes an approach to that reality from diverse points of view and show the different materializations observed in this area in the studied cases The chapters of this volume allow us to verify this heterogeneous reality and help enrich our knowledge on this broad and interesting topic

OECD Reviews of Evaluation and Assessment in Education Romania 2017 Kitchen Hannah, Fordham Elizabeth, Henderson Kirsteen, Looney Anne, Maghnouj Soumaya, 2017-05-03 Romania's education system has made impressive strides over the past two decades with an increasing share of students mastering the basic competencies that they need for life and work But these average improvements mask significant disparities in learning outcomes and attainment with an

Prof. Izhar, 2015-08-09 **The Knowledge Gap** Natalie Wexler, 2019-08-06 Essential reading for teachers education administrators and policymakers alike STARRED Library Journal The untold story of the root cause of America's education crisis It was only after years within the education reform movement that Natalie Wexler stumbled across a hidden explanation for our country's frustrating lack of progress when it comes to providing every child with a quality education The problem wasn't one of the usual scapegoats lazy teachers shoddy facilities lack of accountability It was something no one was talking about the elementary school curriculum's intense focus on decontextualized reading comprehension skills at the expense of actual knowledge In the tradition of Dale Russakoff's *The Prize* and Dana Goldstein's *The Teacher Wars* Wexler brings together history research and compelling characters to pull back the curtain on this fundamental flaw in our education system one that fellow reformers journalists and policymakers have long overlooked and of which the general public including many parents remains unaware But *The Knowledge Gap* isn't just a story of what schools have gotten so wrong it also follows innovative educators who are in the process of shedding their deeply ingrained habits and describes the rewards that have come along students who are not only excited to learn but are also acquiring the knowledge and vocabulary that will enable them to succeed If we truly want to fix our education system and unlock the

potential of our neediest children we have no choice but to pay attention *The Business of Education* Joel Spring, John Eric Frankson, Corie A. McCallum, Diane Price Banks, 2017-07-06 The Business of Education a comprehensive view of how education policy is made in the US and in some cases globally analyzes and critiques the influence of educational policy networks in a wide range of contexts and from a variety of perspectives including testing college preparation juvenile detention centers special education the arts teacher evaluation systems education of undocumented immigrants college faculty preparation and financial aid A network chart in most chapters illustrates how the major political actors mainly private philanthropic foundations for profit companies government officials and politicians involved in the network are linked Joel Spring internationally renowned scholar and analyst of educational policy situates and frames the network studies in an introduction discussing general theories of education policy networks

Education for Underprivileged Primary and Secondary Students in Malaysia Lay Yoon Fah, 2021-06-21 The best education system provides the best education to all children irrespective of their ethnic group or socio economic background Malaysian education system aims to ensure that all children irrespective of who their parents are and where they are schooling will be equipped with the basic needs to succeed in their future educational endeavours and eventually in daily life and the workforce Malaysian education system strives to narrow the socio economic gap between rural and urban as well as gender in student achievement by 2020 Reducing socioeconomic disparities between rural and urban are likely to have an impact on the achievement gap among students The education system in Malaysia will actively support social mobility by providing additional supports to those who are less fortunate and thus ensure socio economic background of students is no longer a determinant factor of their success in life However in the effort to realize equity in education to all children in Malaysia we are confronted with all sorts of problems and challenges Empirical studies with scientific explanations will provide insights into how education for underprivileged primary and secondary students in Malaysia can be further improved to ensure equal accessibility to quality education This book attempts to bring together prominent researchers and educators in the field of rural education to share their findings experiences reflection and vision on the emerging trends in rural education in the country The book will be of special interest to academics and researchers in the field of rural education curriculum designers policy makers educators teacher educators trainee teachers school principals school inspectorates undergraduate and postgraduate students in universities and colleges in the country

Women Education in 21st Century Riley Witt &, 2019-09-17 In no society do women yet enjoy the same opportunities as men They work longer hours and they are paid less both in total and prorata Their choices as to how they spend their time in both work and leisure are more constrained than they are for men These disparities generate substantial gaps between how much women and men can contribute to society and how much they respectively share in its benefits In most countries a fundamental aspect of these disparities is inequality in access to and performance in education The education of girls and women has been recognized for several decades as a fundamental human right and a developmental

necessity Never the less large gender disparities in enrolment and learning achievements persist Eradicating these disparities is well within the power and spending capacity of the world s governments This book covers all the issues related to women education which makes it a comprehensive and an authentic work on the subject It will be a highly beneficial reference tool for education administrators government and non governmental organizations policy makers teachers and students of women studies and all who work for women s welfare

Written Corrective Feedback: The Role of Learner Engagement Alia Moser,2020-12-21 The book provides new insights into written corrective feedback by describing students expectations as well as mediating factors that influence their engagement with it The book draws on an extensive dataset to illustrate secondary school students behavioural cognitive and emotional engagement with written corrective feedback and the extent to which mediating factors such as teachers peers feedback options attitudes and emotions foster or hinder it It shows why teachers need to provide students with the purpose of the corrective feedback they provide explain how such feedback works and introduce strategies that can be employed to engage with it Based on the finding that a combination of several feedback types is essential to ensure learner engagement the book also provides an extensive description and multiple authentic examples of the Engagement Feedback Mediator Model that was developed in the context of this study

The Rise and Fall of Civic Education Michael Learn,2024-09-16 Social studies is a field in crisis The crisis stems from failure to establish the very foundation of social studies purpose in public education civic education Social studies advocates have never put forth a coherent method for teaching civic education because policymakers and the public have been unable to agree upon a general definition of civic education This issue has disrupted the field since the early days As educators sought to include civic education within public schools as a dedicated field social studies evolved into a blending of history social sciences and civic education Social studies evolution never resolved the differences between the three with each discipline striving to control the narrative Instead of creating a unified field the disciplines devalued social studies and thus any discipline associated with it The Rise and Fall of Civic Education The Battle for Social Studies in a Shifting Historical Landscape investigates the changing definitions and purposes ascribed to social studies in the United States through time This result is viewed through the rising tensions from culture wars as America s divisive politics fight to control the narrative of the disciplines within social studies

Ghosts of the Somme Jonathan Evershed, 2018-05-30 Once assumed to be a driver or even cause of conflict commemoration during Ireland's Decade of Centenaries came to occupy a central place in peacebuilding efforts The inclusive and cross communal reorientation of commemoration particularly of the First World War has been widely heralded as signifying new forms of reconciliation and a greater maturity in relationships between Ireland and the UK and between Unionists and Nationalists in Northern Ireland In this study Jonathan Evershed interrogates the particular and implicitly political claims about the nature of history memory and commemoration that define and sustain these assertions and explores some of the hidden and countervailing transcripts that underwrite and disrupt them Drawing on two years of ethnographic fieldwork conducted in Belfast Evershed explores Ulster Loyalist commemoration of the Battle of the Somme its conflicted politics and its confrontation with official commemorative discourse and practice during the Decade of Centenaries He investigates how and why the myriad social political cultural and economic changes that have defined postconflict Northern Ireland have been experienced by Loyalists as a culture war and how commemoration is the means by which they confront and challenge the perceived erosion of their identity He reveals the ways in which this brings Loyalists into conflict not only with the politics of Irish Nationalism but with the peacebuilding state and crucially with each other He demonstrates how commemoration works to reproduce the intracommunal conflicts that it claims to have overcome and interrogates its nuanced and perhaps counterintuitive function in conflict transformation
