World Development Report 2013 World Bank, 2012-10-15 Jobs provide higher earnings and better benefits as countries grow but they are also a driver of development Poverty falls as people work their way out of hardship and as jobs empowering women lead to greater investments in children Efficiency increases as workers get better at what they do as more productive jobs appear and less productive ones disappear Societies flourish as jobs bring together people from different ethnic and social backgrounds and provide alternatives to conflict Jobs are thus more than a byproduct of economic growth They are transformational they are what we earn what we do and even who we are High unemployment and unmet job expectations among youth are the most immediate concerns But in many developing countries where farming and self employment are prevalent and safety nets are modest are best unemployment rates can be low In these countries growth is seldom jobless Most of their poor work long hours but simply cannot make ends meet And the violation of basic rights is not uncommon Therefore the number of jobs is not all that matters jobs with high development payoffs are needed Confronted with these challenges policy makers ask difficult questions Should countries build their development strategies around growth or should they focus on jobs Can entrepreneurship be fostered especially among the many microenterprises in developing countries or are entrepreneurs born Are greater investments in education and training a prerequisite for employability or can skills be built through jobs In times of major crises and structural shifts should jobs not just workers be protected And is there a risk that policies supporting job creation in one country will come at the expense of jobs in other countries The World Development Report 2013 Jobs offers answers to these and other difficult questions by looking at jobs as drivers of development not as derived labor demand and by considering all types of jobs not just formal wage employment The Report provides a framework that cuts across sectors and shows that the best policy responses vary across countries depending on their levels of development endowments demography and institutions Policy fundamentals matter in all cases as they enable a vibrant private sector the source of most jobs in the world Labor policies can help as well even if they are less critical than is often assumed Development policies from making smallholder farming viable to fostering functional cities to engaging in global markets hold the key to success

Charter School City Douglas N. Harris, 2020-07-15 In the wake of the tragedy and destruction that came with Hurricane Katrina in 2005 public schools in New Orleans became part of an almost unthinkable experiment eliminating the traditional public education system and completely replacing it with charter schools and school choice Fifteen years later the results have been remarkable and the complex lessons learned should alter the way we think about American education New Orleans became the first US city ever to adopt a school system based on the principles of markets and economics When the state took over all of the city s public schools it turned them over to non profit charter school managers accountable under performance based contracts Students were no longer obligated to attend a specific school based upon their address allowing families to act like consumers and choose schools in any neighborhood The teacher union contract tenure and certification rules were eliminated giving schools autonomy and control to hire and fire as they pleased In *Charter School City* Douglas N Harris provides an inside look at how and why these reform decisions were made and offers many surprising findings from one of the most extensive and rigorous evaluations of a district school reform ever conducted Through close examination of the results Harris finds that this unprecedented experiment was a noteworthy success on

almost every measurable student outcome But as Harris shows New Orleans was uniquely situated for these reforms to work well and that this market based reform still required some specific and active roles for government Letting free markets rule on their own without government involvement will not generate the kinds of changes their advocates suggest Combining the evidence from New Orleans with that from other cities Harris draws out the broader lessons of this unprecedented reform effort At a time when charter school debates are more based on ideology than data this book is a powerful evidence based and in depth look at how we can rethink the roles for governments markets and nonprofit organizations in education to ensure that America s schools fulfill their potential for all students
