

Substitute Teacher's Survival Guide

10 Keys to Success

Substitute teaching is a very challenging job. Whether your assignment is as a substitute, guest or visiting teacher working at the elementary, middle or high school, this reference guide is packed with valuable and practical information that will greatly assist you in your assignment. Although substitute procedures vary from school to school, these 10 Keys to Success can be utilized in conjunction with "school-specific" training and resources to make your experience positive and rewarding.

Key #1 Arrive Early and Ask Questions

It is important that you arrive early for your substitute assignment. Upon arrival, report directly to the school's main office (unless otherwise directed) and be prepared to ask the following questions:

- When am I substituting for? If you already know the name of the teacher and class, then just confirm that information upon arrival. Automated substitute registry systems often provide on-line or phone substituted information to substitutes prior to your arrival for work.
- Where is the substitute folder or packet of materials? A designated substitute folder is available either in the main office or in the teacher's desk in the assigned classroom. It contains important information such as the daily schedule, class roster(s), and lesson plans that you will need to review prior to the students' arrival.
- Where is the classroom located and the key to the door? In many schools, classroom doors can only be locked and unlocked with a key in the event of an intruder/intrusion situation, you will need to ensure your classroom. (See Key #5 on page 2).
- Do I have a list of contact numbers to call in an emergency? You should have the telephone number of the main office and the nurse in the event of any emergency. It is also important to know who your primary contact person is during your substitute assignment period. It may be a main office secretary or assistant principal, or a departmental chairperson. Regardless of who is designated, you should know to whom questions during your substitute assignment are directed.
- Do I have any other duties during the day? It is important to note that in many schools classroom teachers have duty periods that might arise supervision during non-instructional periods of the day (i.e., bus arrival/departure, lunchtime recess, bell duty).
- Is there anyone else with whom I will be directly working? Your assignment might be in a special education or co-teaching environment. This may be working directly with a paraprofessional or another teacher. If so, you will need to meet this colleague as soon as possible.

Classroom: Although many schools have formal training or orientation for substitutes, before they begin work, others do not. Also, if you were hired after the designated training, you may not have received all of the orientation materials. Ask the school or district in which you work if they provide any substitute orientation or training materials.

Key #2 Organize the Day's Activities

Arriving early to work will also provide you with sufficient time to prepare for the day's activities. Before students arrive is a great time to:

- Review the materials left by the teacher in teacher substitute folder
 - Class material and seating charts
 - Daily schedule
 - Lesson plans for the day
- Review any materials provided by the school district or building
 - Attendance reporting procedures
 - Emergency procedures
 - Staff substitute (for middle & high school environments)
- Check the emergency exit route in the event of a fire or evacuation
- Tour the classroom to familiarize yourself where things are located
 - Are there different work centers or stations?
 - Is an interactive whiteboard or other technology available?
 - Is there a "quiet" corner or designated "quiet down" area?
 - Where are supplies kept?
 - Is there a class library?
- Meet any colleagues with whom you may be expected to work
 - A paraprofessional
 - A grade or subject area colleague
 - A co-teacher
 - The team leader or department chairperson

Practical Note: Organization for long-term versus short-term assignments is much easier since you will have the advantage of building relationships with students, parents, and professional colleagues.

Key #3 Introduce Yourself in a Positive Fashion

How you introduce yourself upon the arrival of students, either at the beginning of the day for elementary students, or at the beginning of each instructional period at middle and high school level, is extremely important. This introduction serves as a first impression for your students and

- what you say and how you say it will go a long way in setting the stage for the remainder of the day or class period. Besides introducing yourself by name, consider including the following points:
 - You will be following the lesson plans and learning activities left by their regular classroom teacher.
 - You will be sharing with their regular teacher how the day has gone, including any issues or concerns that arise (e.g., students need to know that if they misbehave or present difficulties, this will be reported to their regular teacher).
 - Ask students to state their first name whenever you call on them or whenever they ask a question.
 - Emphasize that you are excited to be working with them and ask them to help you whenever appropriate.

The Substitute Teacher's Survival Guide Theresa R. Rossi, 1974

The Substitute Teacher's Field Survival Guide George Alton Willson, 2019-12-17 Welcome to the world of substitute teaching Some of what you are about to read is not pretty Some of it is hard and cold and calculated Some of it is painfully amusing at times But all of it is real all of it happens and the methods that we will discuss herein have actually worked in this type of an environment in the public school system And it is an extremely rewarding job if you get the right mindset and attitude going in Without it you will not last a single week let alone the year This book is not one of those cheerful let's make a difference kind of books That sort of thinking will not work anywhere I have ever been This is for you someone who needs a job has been offered this one to do for however long and wishes to do it as best as it can be done in the real world You may like it You may love it You may utterly despise it and all children when you are done But one thing is for sure if you do what is in here you will survive it you will get your paycheck and then you will get to decide the next time that the phone rings if it is for you or someone else You will have the ability to make an enormous difference in the lives of the students this is true but not before you pass all of their many and varied tests This book will introduce you to the stuff that the school board and the administration themselves do not tell you about when they are hiring you They just turn you loose to seek your future in their world and to get it on your own as best as you can This is not really fair because you can get caught up in some major political nonsense before you even know what is happening to you You have to be forewarned about the drama and the boo games and the power plays that will surely be presented to you You have to know exactly what your response must in any of these situations You have to be taught how to control a classroom full of students not a few of whom are actually little monsters All of the things in here happened to one substitute or another and the recommended strategies for dealing with these things have actually all worked in the past for this particular substitute Published December 2013 revised December 2019
