

17. Re-install the stock 12 mm nuts to secure the metal cup down. This step may require 2 people, one pushing down on the cap, in the car, and one installing the nuts from below.

18. Take the 2 provided steel bushings and place them on each side of the shift fork. The bigger one goes on the passenger side. Please note that the shoulders enter into the shift fork holes and they can be held in place on the shift fork by greasing them generously.

******See image to the left and on the next page for hardware installation order in the car.

19. Insert the base of the shifter between the legs of the shift fork and bushings. It may be slightly difficult to insert the shifter between the bushings, however once centred it can be easily adjusted.

******The correct order for hardware installation is pictured in the next step.
