Enhancing the Doctoral Experience

Steve Hutchinson, Helen Lawrence, 2017-03-02. One of the major intangible benefits associated with the postgraduate research experience is precisely that the experience. And more specifically for an increasing number of international research students, the British doctoral experience. This experience is often largely defined and shaped by their relationship with and support from their supervisor. Enhancing the Doctoral Experience brings together the authors' experience and research frameworks and models as well as pragmatic feedback and understanding. This synthesis of scholarly theory and pragmatic sampling has produced a book that provides a scaffold for students and supervisors to have conversations about their expectations, to discuss what supervision is, to articulate clearly what both parties need in order for a successful relationship to occur and to build a mutually beneficial endeavour. In many cases, these conversations can be complicated by cultural and linguistic differences, so the text explicitly addresses these and other sources of misunderstanding. Against a challenging background of growing numbers of students but also increasing pressures on time and costs, Enhancing the Doctoral Experience offers an approach to improve the effectiveness of the doctoral student and increase the professionalization of research supervision. It does so by providing both with an awareness of and a toolkit to approach student diversity.

Routledge Handbook of International Education and Development Simon McGrath, Qing Gu, 2015-07-24. This timely Handbook takes stock of the range of debates that characterise the field of international education and development and

suggests key aspects of a research agenda for the next period. It is deliberately divergent in its approach, recognising the major ideological and epistemological divides that characterise a field that draws on many traditions. Leading and emergent voices from different paradigms and contexts are afforded a space to be heard and each section puts current debates in larger historical contexts. The Handbook is divided in four parts and book ended by an introduction and a conclusion, the latter oriented towards the implications that the volume has for future research agendas. The first part explores major strands of debates about education's place in development theory. The second acknowledges the disciplining of the field by the education for all movement and examines the place that learning and teaching and schools play in development. Part three looks beyond schools to consider early years, adult and vocational education but focuses particularly on the return to thinking about higher education's role in development. The final part considers the changing but still important role that international cooperation plays in shaping education in developing countries. Featuring over thirty chapters written by leading international and interdisciplinary scholars, the Routledge Handbook of International Education and Development offers the first comprehensive and forward looking resource for students and scholars.

When you finally get your data and even better, it makes sense. There's nothing quite like it. Your final research project will give you a flavour of what it will be like if you decide you would like to make a career in scientific research. This book will help you get the most out of that experience. In her years of work with students, Jess Bownes has answered countless questions about conducting and writing about scientific research. In this book, she distils her advice into one essential guide to writing dissertations and research projects and addresses the most common concerns and questions that science students have. This book supports students through the entire process of working on a dissertation, from the early but crucial planning stages through to undertaking practical work and collecting data, researching literature and writing up one's findings. The structure of the book mirrors key stages of a research project or dissertation, making it easy for students to dip in and out as they work on their project. With lists, step-by-step guides and plenty of practical examples, each chapter helps readers to approach their research in a focused and efficient manner. The book provides guidance on how to work effectively with one's supervisor so that readers can better judge when to work independently and how and when to seek advice. As students are often worried about committing accidental plagiarism in research projects, Bownes dedicates a chapter to this topic to ensure students have the skills and knowledge to use sources appropriately. This is an essential companion for any undergraduate or Masters student who is writing a dissertation or research project in the
