

# WINTER SURVIVAL KIT PT. 1

## TUMBLE DRYER

1.

It's not just the temperature within the home that the weather plays havoc with; it's also the laundry as the wet weather prevents washing from going out onto the line. Don't let your dirty laundry build up & make sure your tumble dryer is at its best by checking the hose & lint filter, condenser and keep it running with regular maintenance.

## HEATERS/RADIATORS

2.

From drying clothes which have got wet following a sudden downpour as your run from the car to your home, through to providing much needed heat first thing in the morning; and to accompany your central heating, include panel heaters / radiators in those areas of your home which are cooler (e.g. the garage / conservatory)

## DEHUMIDIFIERS

3.

If you are using radiators to dry your clothes, this will add moisture into the home and can cause damp and will increase your heating bills. Using a dehumidifier will help remove any excess moisture in the home, helping to limit the risk of condensation, damp and mould.

## ELECTRIC BLANKETS

4.

Whilst radiators will help provide a lovely warm temperature for your home, during the winter many of us fight with the cold sheets on the bed. Make these a thing of the past by using an overblanket or underblanket.

## DETERGENT & LIMESCALE REMOVER

5.

This should already be in your home. With your washing machine being used more in winter, and cold temperatures stopping it from drying out, adding this to your "winter survival kit" it will help keep your washing machine bacteria free and your washing smelling fresh.

## VACUUM CLEANER

6.

With the family spending more time within the home, there's likely to be a build up of dirt, from crumbs through to pet hair; all of which can be removed with ease with a fully working vacuum cleaner.

## STAIN REMOVER

7.

With the wet weather comes muddy footprints throughout the house, whilst winter also sees heartier meals & more home entertainment all of which can cause stains. Don't let these blemishes ruin your home, stock up on a variety of stain removers.

## SMOKE ALARMS

8.

These should already be installed within your home, as you should never put your family at risk. In the winter they're even more essential, as you'll be spending more time within your home and greater use of heating appliances.
