*Trust and consumers' willingness to pay for safe and certified safe vegetables in West African cities* Trust and consumers' willingness to pay for safe and certified safe vegetables in West African cities. A comparative analysis of Tamale, Ouagadougou, Bamenda and Bamako Christina Seeger ,2021-11-08 Smallholder farmers cultivating in West African cities often lack access to irrigation water and may use wastewater to irrigate their fields particularly in the dry season Wastewater contaminates vegetables with pathogens so that local consumers are likely to be exposed to health risks Market data on consumers actual payments for safety improved pathogen reduced vegetables are not available in West Africa as vegetables differing in safety levels are sold due to an information deficit on the consumers side at a uniform market price Certification and repeated purchase experience may reduce these information deficits For both market signals to be effective trust is required This book analyses the role of trust in explaining consumers maximum willingness to pay WTP for safe and certified safe food in a Hicksian framework This theory is tested using household data n 2 662 generated from contingent valuation surveys undertaken in Tamale Ouagadougou Bamenda and Bamako The findings show that local consumers are willing to pay substantially higher prices 40 % to 160 % for certified safe vegetables They further suggest that trust in farmers and traders reduces WTP and trust in certifying institutions increases WTP for certified safe vegetables Most WTPs were found to be construct valid They are therefore taken as trustworthy expressions of consumers preferences for safety improved vegetables These results stress

the need to introduce vegetable certification in West African cities      **Econometrics** Samir Ganaka, 2025-02-20

**Econometrics The Essentials** takes you on an engaging journey through the world of econometrics designed to demystify this complex field. In a world where economic decisions shape our daily lives, understanding the interplay between economic theories and statistical methods is crucial. This book, crafted for a diverse global audience with a focus on the United States, serves as your guide through the landscape of econometrics. We present the subject in everyday language, making it accessible to both newcomers and seasoned practitioners. Econometrics is more than numbers; it's about uncovering the stories behind economic phenomena, understanding the drivers of our economies, and helping readers make sense of the complex web of data. The book emphasizes the global relevance of econometric principles while offering insights into the U.S. economic landscape. We explore the impact of fiscal policies, financial markets, and other economic intricacies. Practical concepts such as regression analyses, instrumental variables, and Two Stage Least Squares Estimation are grounded in relatable scenarios and real-world applications. Our human-centric approach recognizes that behind every data point is a story involving individuals and communities. We illustrate how econometric techniques address pressing issues, from unemployment dynamics to the effectiveness of social programs. **Econometrics The Essentials** equips readers with the skills to navigate econometrics, fostering a deeper understanding of the empirical realities shaping our world. Whether you're a policymaker, economist, researcher, or curious mind, this book empowers you with the knowledge and tools to unravel the mysteries of econometrics.      **Innovation and Market Value. The Case of Tourism Enterprises** Dawid

Szutowski, 2017-03-18. In contemporary economics, only one thing is constant: constant change. Gunday et al. 2011. The notion of change relates directly to innovation. The very nature of innovation constitutes combining existing factors in a new, changed way. Since the early stage of the scientific investigation of innovation, research has focused mainly on the solutions actually implemented. Schumpeter 1939. Yet it is only through implementation that the benefits of innovation may materialise. The task is not simple. The process of obtaining the gains is complex, as innovation may pass through different stages. Thus, for almost half a century, the scientific community has considered innovation to be a complex process and not just a simple occurrence. Myers and Marquis 1969. Innovation pushes progress forward. Thus, previous scientific investigation limited the concept of innovation to implementations which generate positive effects. Nelson and Winter 1982. The above scientific considerations still hold today. Moss Kanter 2006. Innovation is of crucial importance for tourism companies, which cover accommodation for visitors, food and beverage serving activities, passenger transportation, travel agencies, and other reservation activities, cultural activities, sports and recreational activities, and retail trade of country-specific tourism characteristic goods. UNWTO 2010. It provides them with competitive advantage, and hence the firms with market power gain more from innovation. Tirole 1995. A firm's innovation interacts with the environment. It delivers diverse benefits to the consumers in the form of new products and lower prices, which in turn impact positively on the company. Shiller 2006. In the

context of tourism the ongoing scientific discussion on innovation seems not to have achieved any definite conclusions yet The implementation of innovation in tourism enterprises leads to the achievement of diverse ends From this point of view the measurement of the effects of innovation is of vital importance There are a number of financial measures covering substantially different fields The most comprehensive amongst them is a company's value It covers all the aspects of a company's activity Bodie and Merton 2000 However due to its importance and complexity numerous approaches to company value were created The basic distinction covers book and market value based approaches The proponents of book value assume that the balance sheet yields a reliable estimate of the value of assets and equities However numerous shortcomings emerge the static character dealing with historical figures failing to include intangibles and treating all classes of accounts as having equal importance Nunes 2003 The market value based approach stands for the price that assets would fetch in the marketplace Fabrozi and Drake 2009 The main objective of the research is to measure the short and long term impact of innovation announcements on the market value of equity of tourism enterprises

High-dimensionality in Statistics and Portfolio Optimization Konstantin Glombek, 2012 *Impact of State Restructuring on Indonesia's Regional Economic Convergence* Adiwan Fahlan Aritenang, 2017-03-09 The creation of the ASEAN Free Trade Area AFTA in 1992 and decentralization in 1999 mark the state restructuring in Indonesia This book analyses the impact of state restructuring on regional economic development in Indonesia between 1993 and 2010 Regional economic analysis shows persistent and severe regional disparities throughout the period Particularly econometrics study found that decentralization has accelerated regional disparities whilst the AFTA effect is insignificant on regional economic growth Furthermore historical institutionalism analysis on two cities the manufacturing industry in Batam and the creative economy in Bandung shows that past and embedded local institutions provide the capacity to adapt and create new development paths The book suggests the importance of local specific policies that embrace local knowledge and institutions to develop regional specialization and competitive advantage This book fills the gap in Indonesian literature that lacks studies on the integrated impact of decentralization and trade liberalization both economically and politically
