

A GUIDE TO SLOWPITCH SOFTBALL

1: The Basic Game

Slowpitch Softball is played by two teams of ten players each. The teams take it in turns to bat and field. The batting team is called the **OFFENSIVE** team and the fielding team is called the **DEFENSIVE** team.

Most Slowpitch Softball is played by mixed teams, where men and women play together, usually in a 5:5 ratio. However, this ratio sometimes varies, and Slowpitch is sometimes played by single-sex teams as well.

The basics of Softball are very simple. One player, the **PITCHER**, pitches the ball to a **BATTER** who hits it and runs around as many bases as possible before the ball is retrieved and returned under control by the defensive team. The aim of the game is to score more **RUNS** than the opposition, and a run is scored when a player on the batting team advances successfully around all three bases and back to the home base (called **HOME PLATE**) from whence he/she started.

Unless you hit the ball so far that you can run around all the bases before it's returned (a **HOME RUN**), you will have to stop at one or more bases on your way around and wait for the next batter to hit the ball so you can advance further.

Meanwhile, the defensive team is trying to get batters and base runners **OUT**, either by catching balls hit in the air, or in various other ways we'll get to later. As soon as three players on the offensive team have made outs, the two teams switch: The defensive team comes in to bat and the batting team goes out to the field to defend.

An inning is completed when each team has batted, and a full game consists of seven innings, usually taking between 60 and 90 minutes to play. Players bat in a prearranged order (in mixed games with a 5:5 ratio, men and women bat alternately). After the last batter in the order has hit, the first batter comes up again, if the final out in an inning is made by, say, the fourth batter in the order, then the fifth batter will be the first to hit

when the team comes in to bat again. Batters keep their place in the batting order even if they were out last time they batted.

2: The Playing Area

A Softball playing area is contained within a 90-degree angle, and is usually called a **DIAMOND**, because the central part of the playing field - the **INFIELD** - is diamond-shaped. The **OUTFIELD** extends outward from the infield to a boundary, either actual or notional. From above, the playing area looks like the illustration following.

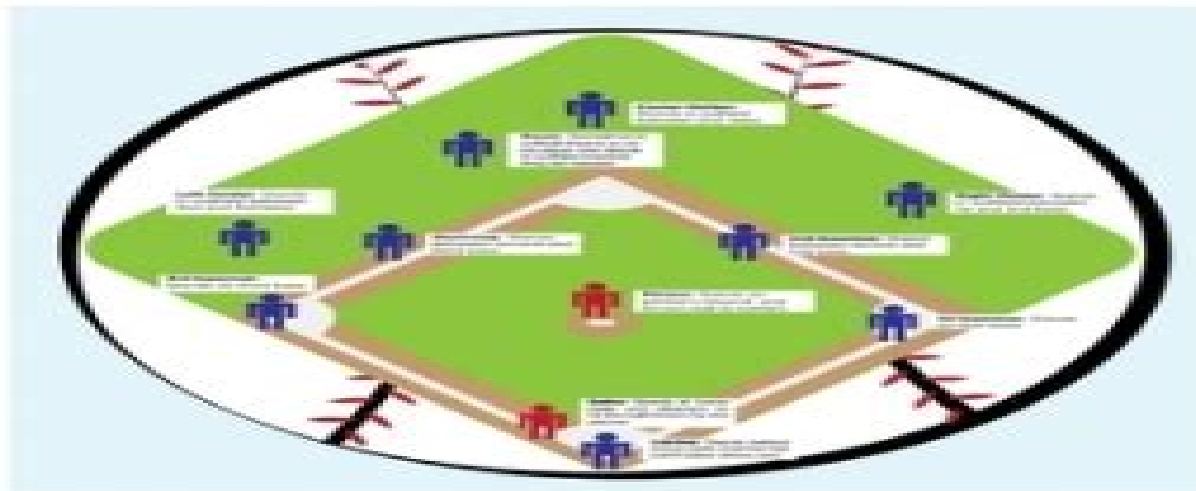

Everything inside the thick black lines is known as **FAIR TERRITORY** and is where most of the action takes place. The shaded area outside these lines is called **FOUL TERRITORY**, where some action can take place. Everything beyond this is called **DEAD BALL TERRITORY** because if this ball goes into this area, all action stops. As a basic rule, the batter must hit the ball into fair territory.

You will often hear people referring to **LEFT FIELD**, **CENTRE FIELD** and **RIGHT FIELD**. These terms mean exactly what they say. Left field is that part of the outfield which is to the left as you look at the field diagram; centre field is the outfield area behind second base; and right field is the outfield area to the right on the diagram.

The pitcher stands on a rectangular piece of heavy rubber, the **PITCHER'S PLATE (P)**, and tries to pitch the ball across **HOME PLATE (H)**, a five-sided piece of heavy rubber, guarded by the batter, 50 feet away.

Each **BASE** (First Base, Second Base and Third Base) is marked by plastic bag filled with foam. The distance between each base is 65 feet (quite a long way!).

For safety reasons, **FIRST BASE** often consists of a double base, half white and half orange, with the orange section in foul territory and the white section in fair territory. The batter heads for the orange part, the fielder uses the white part, and collisions are avoided.
